

NOTICE OF PUBLIC INFORMATION CENTRE #2

**Master Plan Class Environmental Assessment Study
and Pumping Station Capital Needs Assessment**

The Study

Halton Region is undertaking a Pumping Station Capital Needs Assessment and Master Plan Class Environmental Assessment Study (Master Plan Class EA Study) for 59 sewage pumping stations located in the southern portion of the City of Burlington and the Town of Oakville. The aim of this study is to take an integrated approach to the planning and asset renewal of the pumping stations within the drainage areas of the Burlington Skyway, Oakville Southwest and Oakville Southeast Wastewater Treatment Plants. The Master Plan Class EA Study is addressing and integrating three important issues: normal aging and deterioration of pumping stations, capacity demands (current and future) and operational efficiency. The results of the study will be incorporated into the development of servicing options for the Sustainable Halton Water and Wastewater Servicing Master Plan Study.

The Process

The study is being conducted in accordance with the requirements for master plans under Section 4, Approach #2 of the Municipal Class Environmental Assessment (Municipal Engineers Association 2007), which is an approved process under the Ontario Environmental Assessment Act. The Master Plan Class EA Study will fulfill Phases 1 and 2 of the Municipal Class EA process. As such it will identify a range of servicing strategy solutions, evaluate the proposed alternative solutions, and recommend a Preferred Servicing Solution. Public consultation is an integral part of the planning process.

Public Information Centres (PICs) will be held in two locations:

Municipality	Date	Time	Location
City of Burlington	Wednesday, June 16, 2010	6:30 p.m. to 9:00 p.m. with presentation at 7:00 p.m.	Burlington Art Centre – Shoreline Room 1333 Lakeshore Road, Burlington, ON
Town of Oakville	Tuesday, June 15, 2010	6:30 p.m. to 9:00 p.m. with presentation at 7:00 p.m.	Walton Memorial United Church – Bronte Hall 2489 Lakeshore Road West, Oakville, ON

The PICs will provide an opportunity to review and comment on the decision making process for evaluating the different conceptual alternative solutions in the three drainage areas of Oakville and Burlington. Preliminary recommended servicing solutions for each of the drainage areas will also be presented. Representatives from Halton Region and its consultants will be available to provide information and answer questions.

You are encouraged to attend a PIC and provide your comments for inclusion in the study. Upon completion, a Master Plan Report will be prepared to document the planning process followed, including conclusions and recommendations, and how public input was received and addressed. The Master Plan Report will be available for public review for a minimum of 30 calendar days. At that time, a Notice of Completion will be published and mailed to those individuals on the project contact list.

Please contact either one of the following project team members if you have any questions or comments, wish to obtain more information on the project, or if you would like to be added to the mailing list:

Magda Bielawski, P. Eng.
Project Manager
Wastewater Planning, Public Works
