APPENDIX A
Influence of Legislation

Appendix A – Influence of Policy and Legislation on the TMP

Act / Policy	Description	Influence
2005 Provincial Policy Statement	The Provincial Policy Statement establishes the foundation for regulating land use and development within the Province of Ontario. The Provincial Policy Statement provides for appropriate development and protects resources of provincial interest. The vision of the land use planning system in the Provincial Policy Statement states that the long term prosperity and social well being of Ontarians depends on maintaining strong communities, a clean healthy environment and a strong economy. The Provincial Policy Statement promotes a variety of transportation choices.	■ Input to ROPA 38
Greenbelt Act (2005)	The Province passed legislation under the Greenbelt Protection Act (Bill 135), which established a Greenbelt Plan for the Greater Golden Horseshoe (GGH). Established in February 2005, the Greenbelt spans 1.8 million acres across Southern Ontario. The area stretches 325 kilometres from Rice Lake in Northumberland County to the Niagara River and is roughly 80 kilometres wide at its widest point. The Greenbelt Act, 2005 protects environmentally sensitive land and agricultural	 Input to ROPA 38 A key provision of the Plan is to "ensure that the development of transportation and infrastructure proceeds in an environmentally sensitive manner."
	land in the Golden Horseshoe from urban development and sprawl.	
Places to Grow Act, 2005 (Bill 136)	Bill 136, or the Places to Grow Act, enables the Province to play a lead role in determining how the Greater Golden Horseshoe (GGH) and Greater Toronto Area (GTA) will grow in the future. Places to Grow states that public transit will be the first priority for transportation infrastructure planning and major transportation investments. Places to Grow is a framework for implementing the Government of Ontario's vision for building stronger, prosperous communities by better managing growth in this region to 2031. The objectives of the Act are to:	The Provincial Growth Plan identifies public transit as a first priority for transportation planning and major transportation investments, and sets out criteria on which to base all transit planning and investment decisions that include placing priority on improving linkages from nearby neighbourhoods to urban growth centres, major transit areas and other intensification areas. The Act specifies municipalities to identify and support a transportation network that links urban growth centres through an extensive multi-modal system anchored by efficient public transit, together with highway systems for moving people and goods.

Act / Policy	Description	Influence
	 Offer a balance of transportation choices; Provide public transit as the first priority; Support opportunities for multi-modal use where feasible; Increase the modal share of transit; and Be sustainable. 	The Act directs municipalities to: • make public transit the first priority for transportation infrastructure planning and major transportation investments; and • increase the modal share of transit.
Halton Region Official Plan Amendment 38 (ROPA 38)	On December 16, 2009, Halton Regional Council adopted ROPA 38 "An Amendment to Incorporate the Results of Sustainable Halton, Official Plan Review Directions and Other Matters". With ROPA 38's adoption, Halton Region fulfils the provincial requirements to plan for growth and integrates the principle of sustainability into its Official Plan. ROPA 38 outlines how and where Halton will grow from 2021-2031. ROPA 38 is the final phase of a process that began in 2006 as a response to provincial requirements set out in policy including the Places to Grow Plan, the Greenbelt Plan and the Provincial Policy Statement. ROPA 38 requires the Region to prepare: a master plan for urban services and transportation facilities; and a Joint Infrastructure Staging Plan, based on population and employment targets. The purpose of the master plan and infrastructure staging plan is to ensure that infrastructure and human services to support development is planned and financing is secured in advance of need.	The Region's vision of creating complete, healthy and sustainable communities directs the following transportation matters be incorporated in the Region's transportation master planning: "172(2) To develop a balanced transportation system that: a) reduces dependency on automobile use; b) includes a safe, convenient, accessible, affordable and efficient public transit system that is competitive with the private automobile; and c) promotes active transportation." "172(6) To support seamless public transit services in Halton that: a) provide a high level of service internally within Halton, b) include continuous enhancements of the GO Transit system within Halton, c) are connected to a higher order transit network throughout the Greater Toronto and Hamilton Area, d) are complemented and supported by a network of active transportation facilities, and e) are fully integrated both internally and externally in terms of fare and service." "172(8) To achieve a level of public transit usage that averages at least 20 per cent of all daily trips made by Halton residents by year 2031." 172(9.1) To ensure development is designed to support active transportation and public transit. "172(9.2) To integrate transportation planning, land use planning and investment in infrastructure." "172(13) To ensure that the planning, development and design of the transportation system take into account social, economic and environmental factors as well as the needs of the agricultural community and consider, where appropriate, alternative design standards consistent with policies of this Plan." "173(10) Coordinate with the Province, Metrolinx and the Local Municipalities the

Act / Policy	Description	Influence
		planning, development and funding of both highway and inter-regional higher order transit projects in Halton to ensure the provision of a balanced transportation system with an acceptable level of service."
Metrolinx's "The Big Move" – Regional Transportation Plan	The mandate to create a Regional Transportation Plan (RTP) is embodied in the Greater Toronto Transportation Authority Act, 2006, which established Metrolinx and directed it to create a long-term strategic plan for an integrated, multi-modal, regional transportation system. Metrolinx completed its RTP, called The Big Move, on November 28, 2008. It is a \$50 billion plan over 25 years, designed to help alleviate congestion and improve transportation and recommends a variety of new projects, including new subway lines, light rail lines and extending and improving existing GO Transit lines and high speed rail to Pearson International Airport from Toronto. The Big Move sets out priorities, policies and programs for a future of complete mobility. The aim of the RTP is to achieve a transportation system for the Greater Toronto and Hamilton Area (GTHA) that is effective, integrated and multimodal. The RTP presents a vision for the future in which transportation within the GTHA is seamless, coordinated and efficient. As defined by the Act, this is to be a transportation plan that: Takes into account all modes of transportation; Makes use of intelligent transportation systems; Promotes the integration of local transit systems with each other and with the GO Transit system; Works toward easing congestion and commute times, and reducing transportation-related emissions of smog precursors and greenhouse gases; and Promotes transit-supportive development and the viability and optimization of transit infrastructure.	The Big Move makes the following directives with regards to transportation: • Transportation choices: People will have a wide range of options available to them for getting around (including walking, cycling, public transit and automobiles); • The transportation system will operate sustainably within the capacities of, and in balance with, the GTHA's ecosystems. GHGs and other emissions related to transportation will be reduced; and • Active and healthy lifestyles: Walking and cycling will be attractive and realistic choices for all.

Act / Policy	Description	Influence
Act to Amend the Greater Toronto Transportation Authority Act, 2006 (Bill 163) and the Greater Toronto and Hamilton Area Transit Implementation Act, 2009	In the spring of 2009, the Government of Ontario prepared legislation to create a single transit agency and a regional network for the Greater Toronto and Hamilton Area (GTHA). The legislation merges GO Transit and Metrolinx into a single transit agency and promotes a co-ordinated approach to transportation planning in the GTHA. This legislation is Bill 163, An Act to Amend the Greater Toronto Transportation Authority Act, 2006 and to Make Consequential Amendments to Another Act (The Greater Toronto and Hamilton Area Transit Implementation Act, 2009).	Bill 163 directs municipal master plans to be consistent with provincial policy statements, thus it creates a system for coordinated regional planning. Bill 163 directs municipal master plans to be consistent with provincial policy statements, thus it creates a system for coordinated regional planning.
	Bill 163 transitions Metrolinx from a planning body to an implementation body; that is, an organization that delivers new infrastructure "rapidly and effectively". As part of these powers, Metrolinx will also have a voice in planning matters through the Minister of Transportation's planning policy	
Transportation Provincial Policy Statements (TPPS) (to be released)	statements. Although not yet released at the time of this publication, the purpose of the TPPS will be to align transportation policy and land use planning policy/legislation as follows: The TPPS must be in alignment with the Growth Plan; The TPPS must have regard to Metrolinx's RTP; and Planning Act decisions must be consistent with designated TPPS policies.	■ The Act states that all GTHA municipal decisions regarding transportation must be consistent with the TPPS.
	The Metrolinx Act, 2006, authorizes the Minister to issue transportation planning policy statements (TPPS) on matters relating to transportation planning in the GTHA.
