

APPENDIX A

Public and Agency Contacts

**NOTICE OF STUDY COMMENCEMENT /
PUBLIC INFORMATION CENTRE #1
CLASS ENVIRONMENTAL ASSESSMENT STUDY**

Derry Road (Regional Road 7) Transportation Corridor Improvements
Milborough Line (Regional Road 24) to McNiven Road,
City of Burlington and Town of Milton
PR2598

Study

Halton Region is initiating a Class Environmental Assessment (Class EA) to consider a wide range of options for road improvements along the Derry Road corridor. In order to best address operational deficiencies along the Derry Road corridor, a number of road improvement alternatives will be examined as part of the study including structural and drainage deficiencies, cross-sectional requirements, intersection improvements and overall traffic operations, as well as the impact of such improvements on the social and natural environments.

Process

This notice signals the commencement of the Class EA, a study which will define the problem, identify and evaluate alternative solutions, and determine a preferred solution in consultation with the Town of Milton, City of Burlington, regulatory agencies, and the public. The study is being conducted in compliance with Schedule C of the Municipal Class Environmental Assessment (October 2000, amended 2007), which is approved under the Ontario Environmental Assessment Act.

Public and review agency consultation is a key element of the Class EA process and input will be sought from parties throughout this study. At this time, it is anticipated that two (2) Public Information Centres (PICs) will be conducted. Upon completion of the study, a comprehensive Environmental Study Report will be prepared and tabled for public review and comment. The document will detail the planning process and the preferred alternative including how the public and agency input was received. A notice of completion will be issued at that stage.

You will be notified through advertisement in the local newspapers and mail outs regarding the PICs. The PICs will provide an opportunity for you to review the alternative solutions, provide comment and discuss concerns you may have with representatives from Halton Region and R and R Associates Ltd. The first PIC is scheduled for Wednesday, November 11, 2009.

Comments

We are interested in hearing any questions or comments you may have concerning this project. You are encouraged to provide your comments so that they may be included in the study. Comments received through the course of the study will be considered prior to finalizing the preferred solution. Please contact either of the following project team members if you wish to be added to the project mailing list, if you have any questions or comments, or wish to obtain more information about the project.

Public Information Centre

Date: Wednesday, November 11, 2009

Time: 6:30pm – Drop-in

7:00pm – Formal Presentation

Place: Kilbride Public School
6611 Panton Street
Burlington, Ontario

The map below shows the approximate limits of the study area.

Attention: **Deborah Bradford**

Re: **Derry Road (Regional Road 7) Transportation Corridor Improvements
Milborough Line (Regional Road 24) to McNiven Road
Class Environmental Assessment Study
City of Burlington and Town of Milton, Regional Municipality of Halton**

Dear Ms. Bradford:

The Regional Municipality of Halton has recently initiated a Class Environmental Assessment Study for transportation corridor improvements on Derry Road (Regional Road 7) from Milborough Line (Regional Road 24) to McNiven Road at the boundary of the Town of Milton and the City of Burlington. The purpose of this study will be to address the need for roadway improvements along this corridor. Please refer to the attached *Notice of Study Commencement* for further details.

Based on the Region's assessment of the types of improvements required, the Region proposes to carry out this project in compliance with Schedule 'C' of the *Municipal Engineers Association Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region will be maintaining a mailing list of interested landowners, residents and other stakeholders. Currently, your name has been included on our list. However, should you wish to have your name removed from the list, please contact the undersigned at (905) 937-1708 or email at RHein@RandR-Associates.com.

As a stakeholder located within the study area, we are also contacting you to inform you that we will be holding our first Public Information Centre (see attached Notice of Study Commencement) on **Wednesday, November 11, 2009**. The Public Information Centre will provide you with an opportunity to meet the Project Team, to discuss the proposed approach to fulfill the requirements for a Schedule 'C' project, and to provide input into the identification of road improvement alternatives. Your comments are welcomed and we encourage you to provide us with your views. Details regarding the forthcoming Public Information Centre are included in the attached notice. If you have any questions or require additional information, please contact the undersigned.

Sincerely,

R and R Associates Inc.

The Regional Municipality of Halton has recently initiated a Class Environmental Assessment Study for transportation corridor improvements on Derry Road (Regional Road 7) from Milborough Line (Regional Road 24) to McNiven Road at the boundary of the Town of Milton and the City of Burlington. The purpose of this study will be to address the need for roadway improvements along this corridor. Please refer to the attached *Notice of Study Commencement* for further details.

Based on the Region's assessment of the types of improvements required, the Region proposes to carry out this project in compliance with Schedule 'C' of the *Municipal Engineers Association Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region will be maintaining a mailing list of interested landowners, residents and other stakeholders. Currently, your name has been included on our list. However, should you wish to have your name removed from the list, please contact the undersigned at (905) 937-1708 or email at RHein@RandR-Associates.com.

As a stakeholder located within the study area, we are also contacting you to inform you that we will be holding our first Public Information Centre (see attached Notice of Study Commencement) on **Wednesday, November 11, 2009**. The Public Information Centre will provide you with an opportunity to meet the Project Team, to discuss the proposed approach to fulfill the requirements for a Schedule 'C' project, and to provide input into the identification of road improvement alternatives. Your comments are welcomed and we encourage you to provide us with your views. Details regarding the forthcoming Public Information Centre are included in the attached notice. If you have any questions or require additional information, please contact the undersigned.

Sincerely,

R and R Associates Inc.

Class Environmental Assessment Study
City of Burlington and Town of Milton, Regional Municipality of Halton

Dear Ms. Knox:

The Regional Municipality of Halton has recently initiated a Class Environmental Assessment Study for transportation corridor improvements on Derry Road (Regional Road 7) from Milborough Line (Regional Road 24) to McNiven Road at the boundary of the Town of Milton and the City of Burlington. The purpose of this study will be to address the need for roadway improvements along this corridor. Please refer to the attached *Notice of Study Commencement* for further details.

Based on the Region's assessment of the types of improvements required, the Region proposes to carry out this project in compliance with Schedule 'C' of the Municipal Engineers Association *Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region has decided to form a Technical Agencies Committee to provide input to the Project Team as we proceed. It is the Region's intention to meet with the Technical Agencies Committee two times during the study.

The first Technical Agencies Committee meeting is set for **Tuesday, November 10, 2009 at 1:30 p.m. at the Hugh Foster Hall in the Town of Milton, Ontario** (see attached location map). Please advise the Project Team regarding your agency's involvement in the study using the attached Fax Back Form by **Monday, November 2, 2009**. The initial Technical Agencies Committee meeting will provide you with an opportunity to meet the Project Team, to discuss the proposed approach to fulfill the requirements for a Schedule 'C' project, and to provide input to the identification of road improvement alternatives.

If you have any questions or require additional information, please contact the undersigned at phone number (905) 937-1708 or email at RHein@RandR-Associates.com. Thank you for your assistance with this project and we look forward to working with you.

The Regional Municipality of Halton has recently initiated a Class Environmental Assessment Study for transportation corridor improvements on Derry Road (Regional Road 7) from Milborough Line (Regional Road 24) to McNiven Road at the boundary of the Town of Milton and the City of Burlington. The purpose of this study will be to address the need for roadway improvements along this corridor. Please refer to the attached *Notice of Study Commencement* for further details.

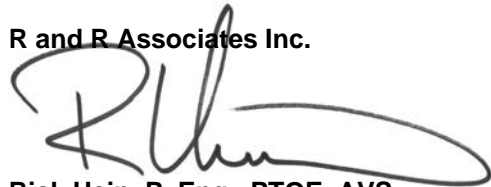

Based on the Region's assessment of the types of improvements required, the Region proposes to carry out this project in compliance with Schedule 'C' of the Municipal Engineers Association *Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region has decided to form a Technical Agencies Committee to provide input to the Project Team as we proceed. It is the Region's intention to meet with the Technical Agencies Committee two times during the study.

The first Technical Agencies Committee meeting is set for **Tuesday, November 10, 2009 at 1:30 p.m. at the Hugh Foster Hall in the Town of Milton, Ontario** (see attached location map). Please advise the Project Team regarding your agency's involvement in the study using the attached Fax Back Form by **Monday, November 2, 2009**. The initial Technical Agencies Committee meeting will provide you with an opportunity to meet the Project Team, to discuss the proposed approach to fulfill the requirements for a Schedule 'C' project, and to provide input to the identification of road improvement alternatives.

If you have any questions or require additional information, please contact the undersigned at phone number (905) 937-1708 or email at RHein@RandR-Associates.com. Thank you for your assistance with this project and we look forward to working with you.

Sincerely,

R and R Associates Inc.

Dear Ms. Scanlon:

The Regional Municipality of Halton has recently initiated a Class Environmental Assessment Study for transportation corridor improvements on Derry Road (Regional Road 7) from Milborough Line (Regional Road 24) to McNiven Road at the boundary of the Town of Milton and the City of Burlington. The purpose of this study will be to address the need for roadway improvements along this corridor. Please refer to the attached *Notice of Study Commencement* for further details.

Based on the Region's assessment of the types of improvements required, the Region proposes to carry out this project in compliance with Schedule 'C' of the Municipal Engineers Association *Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region has decided to form a Technical Agencies Committee to provide input to the Project Team as we proceed. It is the Region's intention to meet with the Technical Agencies Committee two times during the study.

The first Technical Agencies Committee meeting is set for **Tuesday, November 10, 2009 at 1:30 p.m. at the Hugh Foster Hall in the Town of Milton, Ontario** (see attached location map). Please advise the Project Team regarding your agency's involvement in the study using the attached Fax Back Form by **Monday, November 2, 2009**. The initial Technical Agencies Committee meeting will provide you with an opportunity to meet the Project Team, to discuss the proposed approach to fulfill the requirements for a Schedule 'C' project, and to provide input to the identification of road improvement alternatives.

If you have any questions or require additional information, please contact the undersigned at phone number (905) 937-1708 or email at RHein@RandR-Associates.com. Thank you for your assistance with this project and we look forward to working with you.

Sincerely,

R and R Associates Inc.

City of Burlington and Town of Milton, Regional Municipality of Halton

Dear Ms. Young:

The Regional Municipality of Halton has recently initiated a Class Environmental Assessment Study for transportation corridor improvements on Derry Road (Regional Road 7) from Milborough Line (Regional Road 24) to McNiven Road at the boundary of the Town of Milton and the City of Burlington. The purpose of this study will be to address the need for roadway improvements along this corridor. Please refer to the attached *Notice of Study Commencement* for further details.

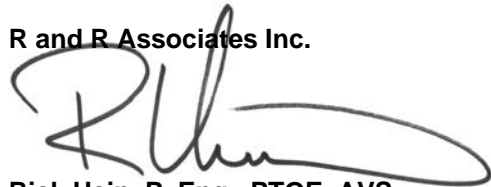

Based on the Region's assessment of the types of improvements required, the Region proposes to carry out this project in compliance with Schedule 'C' of the Municipal Engineers Association *Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region has decided to form a Technical Agencies Committee to provide input to the Project Team as we proceed. It is the Region's intention to meet with the Technical Agencies Committee two times during the study.

The first Technical Agencies Committee meeting is set for **Tuesday, November 10, 2009 at 1:30 p.m. at the Hugh Foster Hall in the Town of Milton, Ontario** (see attached location map). Please advise the Project Team regarding your agency's involvement in the study using the attached Fax Back Form by **Monday, November 2, 2009**. The initial Technical Agencies Committee meeting will provide you with an opportunity to meet the Project Team, to discuss the proposed approach to fulfill the requirements for a Schedule 'C' project, and to provide input to the identification of road improvement alternatives.

If you have any questions or require additional information, please contact the undersigned at phone number (905) 937-1708 or email at RHein@RandR-Associates.com. Thank you for your assistance with this project and we look forward to working with you.

Sincerely,

R and R Associates Inc.

Rick Hein, P. Eng., PTOE, AVS

Re: **Derry Road (Regional Road 7) Transportation Corridor Improvements**
Milborough Line (Regional Road 24) to McNiven Road
Class Environmental Assessment Study
City of Burlington and Town of Milton, Regional Municipality of Halton

Dear Ms. Barnes:

The Regional Municipality of Halton is carrying out a Class Environmental Assessment Study for transportation corridor improvements on Derry Road (Regional Road 7) from Milborough Line (Regional Road 24) to McNiven Road at the boundary of the Town of Milton and the City of Burlington. The study is being undertaken to address the need for roadway improvements along this corridor.

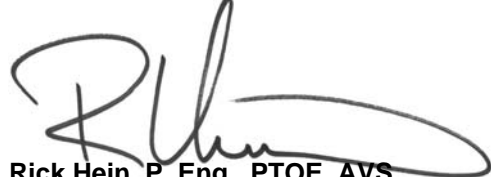

Based on the Region's assessment of the types of improvements required, the Region is carrying out this project in compliance with Schedule 'C' of the Municipal Engineers Association *Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region has formed a Technical Agencies Committee to provide input to the Project Team as we proceed. It is the Region's intention to meet with the Technical Agencies Committee two times during the study. The first Technical Agency Committee Meeting was held on November 10, 2009.

The second Technical Agencies Committee meeting is scheduled for **Tuesday, April 13, 2010 at 3:00 p.m. at the Hugh Foster Hall in the Town of Milton, Ontario** (see attached location map). Please advise the Project Team regarding your agency's involvement in the study using the attached Fax Back Form by **Friday, April 9, 2010**. The second Technical Agencies Committee meeting will provide you with an opportunity to meet the Project Team, to review the problem being addressed, background information and the road improvement alternatives being considered.

If you have any questions or require additional information, please contact the undersigned by phone at (905) 937-1708 or via e-mail at RHein@RandR-Associates.com. Thank you for your assistance with this project and we look forward to working with you.

Sincerely,

R and R Associates Inc.

Attention: **Mr. Vic Gillman**
Area Manager

Re: **Derry Road (Regional Road 7) Transportation Corridor Improvements**
Milborough Line (Regional Road 24) to McNiven Road
Class Environmental Assessment Study
City of Burlington and Town of Milton, Regional Municipality of Halton

Dear Mr. Gillman:

The Regional Municipality of Halton is carrying out a Class Environmental Assessment Study for transportation corridor improvements on Derry Road (Regional Road 7) from Milborough Line (Regional Road 24) to McNiven Road at the boundary of the Town of Milton and the City of Burlington. The study is being undertaken to address the need for roadway improvements along this corridor.

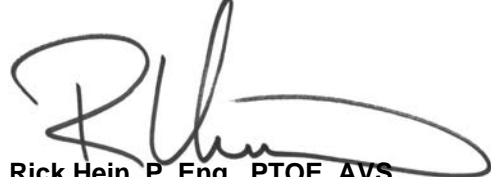

Based on the Region's assessment of the types of improvements required, the Region is carrying out this project in compliance with Schedule 'C' of the Municipal Engineers Association *Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region has formed a Technical Agencies Committee to provide input to the Project Team as we proceed. It is the Region's intention to meet with the Technical Agencies Committee two times during the study. The first Technical Agency Committee Meeting was held on November 10, 2009.

The second Technical Agencies Committee meeting is scheduled for **Tuesday, April 13, 2010 at 3:00 p.m. at the Hugh Foster Hall in the Town of Milton, Ontario** (see attached location map). Please advise the Project Team regarding your agency's involvement in the study using the attached Fax Back Form by **Friday, April 9, 2010**. The second Technical Agencies Committee meeting will provide you with an opportunity to meet the Project Team, to review the problem being addressed, background information and the road improvement alternatives being considered.

If you have any questions or require additional information, please contact the undersigned by phone at (905) 937-1708 or via e-mail at RHein@RandR-Associates.com. Thank you for your assistance with this project and we look forward to working with you.

Sincerely,

R and R Associates Inc.

The Regional Municipality of Halton is carrying out a Class Environmental Assessment Study for transportation corridor improvements on Derry Road (Regional Road 7) from Milborough Line (Regional Road 24) to McNiven Road at the boundary of the Town of Milton and the City of Burlington. The study is being undertaken to address the need for roadway improvements along this corridor.

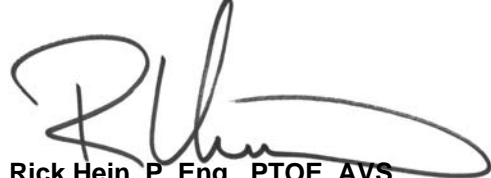

Based on the Region's assessment of the types of improvements required, the Region is carrying out this project in compliance with Schedule 'C' of the Municipal Engineers Association *Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region has formed a Technical Agencies Committee to provide input to the Project Team as we proceed. It is the Region's intention to meet with the Technical Agencies Committee two times during the study. The first Technical Agency Committee Meeting was held on November 10, 2009.

The second Technical Agencies Committee meeting is scheduled for **Tuesday, April 13, 2010 at 3:00 p.m. at the Hugh Foster Hall in the Town of Milton, Ontario** (see attached location map). Please advise the Project Team regarding your agency's involvement in the study using the attached Fax Back Form by **Friday, April 9, 2010**. The second Technical Agencies Committee meeting will provide you with an opportunity to meet the Project Team, to review the problem being addressed, background information and the road improvement alternatives being considered.

If you have any questions or require additional information, please contact the undersigned by phone at (905) 937-1708 or via e-mail at RHein@RandR-Associates.com. Thank you for your assistance with this project and we look forward to working with you.

Sincerely,

R and R Associates Inc.

Based on the Region's assessment of the types of improvements required, the Region is carrying out this project in compliance with Schedule 'C' of the Municipal Engineers Association *Municipal Class Environmental Assessment (October 2000, as amended in 2007)*. As part of the project, the Region has formed a Technical Agencies Committee to provide input to the Project Team as we proceed. It is the Region's intention to meet with the Technical Agencies Committee two times during the study. The first Technical Agency Committee Meeting was held on November 10, 2009.

The second Technical Agencies Committee meeting is scheduled for **Tuesday, April 13, 2010 at 3:00 p.m. at the Hugh Foster Hall in the Town of Milton, Ontario** (see attached location map). Please advise the Project Team regarding your agency's involvement in the study using the attached Fax Back Form by **Friday, April 9, 2010**. The second Technical Agencies Committee meeting will provide you with an opportunity to meet the Project Team, to review the problem being addressed, background information and the road improvement alternatives being considered.

If you have any questions or require additional information, please contact the undersigned by phone at (905) 937-1708 or via e-mail at RHein@RandR-Associates.com. Thank you for your assistance with this project and we look forward to working with you.

Sincerely,

R and R Associates Inc.

PUBLIC INFORMATION CENTRE #2

CLASS ENVIRONMENTAL ASSESSMENT STUDY

Derry Road (Regional Road 7) Transportation Corridor Improvements
Milborough Line (Regional Road 24) to McNiven Road,
City of Burlington/Town of Milton
PR-2598A

Study

Halton Region has initiated a Class Environmental Assessment (Class EA) study to consider a wide range of options for road improvements along the Derry Road corridor from Milborough Line (Regional Road 24) to McNiven Road. In order to best address operational deficiencies along Derry Road, a number of road improvement alternatives have been examined as part of the study; including structural and drainage deficiencies, cross-sectional requirements, intersection improvements and over-all traffic operations, as well as the impact of such improvements on the social and natural environments.

Process

The First Public Information Centre (PIC) was held on November 11th, 2009. Thereafter, the preferred alternative was determined taking into consideration the problem being addressed, alternate solutions, environmental effects and comments that were received from the Local municipalities, regulatory agencies and the public. The preferred alternative includes a number of structural, geometric and roadway cross-section improvements.

A second Public Information Centre has been arranged to review the preliminary preferred alternative and receive public comments. Following the PIC, the preliminary preferred alternative will be reviewed in consideration of comments received to determine whether the preferred alternative can be confirmed or should be modified.

This PIC will provide an opportunity for you to review the preliminary preferred alternative, provide comments and discuss concerns you may have with representatives from Halton Region and R and R Associates Ltd. The second PIC is scheduled for Tuesday, May 4th, 2010.

Public Information Centre #2

Date: Tuesday, May 4, 2010
Time: 6:30pm – Drop-in
7:00pm – Formal Presentation

Place: Kilbride Public School
6611 Panton Street
Burlington, Ontario

Comments

We are interested in hearing any questions or comments you may have concerning this project. You are encouraged to provide your comments so that they may be included in the study. Comments received through the course of the study will be considered prior to finalizing the preferred alternative. Please contact either of the following project team members if you wish to be added to the project mailing list, if you have any questions or comments, or wish to obtain more information about the project. Information requests or questions may be directed to:
