

NOTICE OF STUDY COMMENCEMENT

Lower Base Line Wastewater Pumping Station and Associated
Forcemains Municipal Class Environmental Assessment Study
(PR-3505)

Study

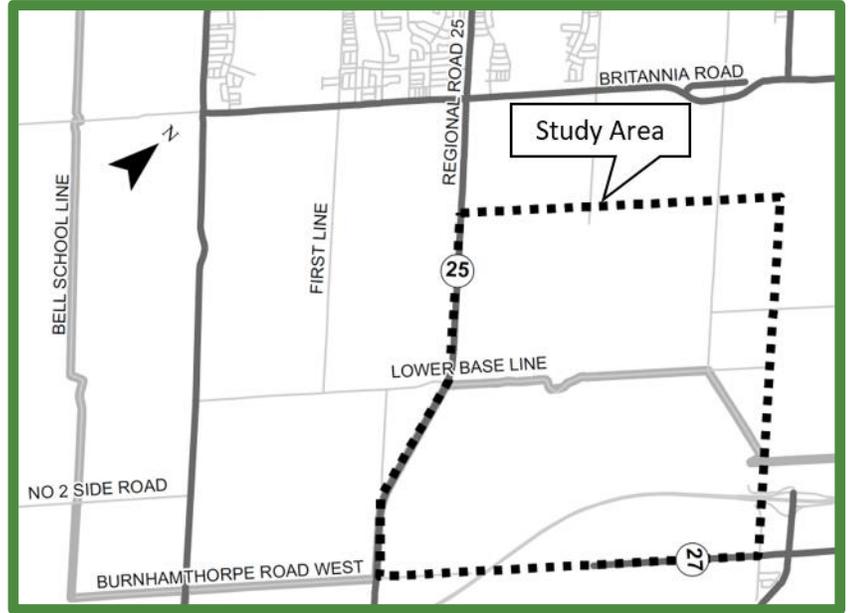

Halton Region is initiating a Municipal Class Environmental Assessment (MCEA) Study for the [Lower Base Line Wastewater Pumping Station and Associated Forcemains](#). This project was identified in the 2011 Sustainable Halton Water and Wastewater Master Plan to support growth in Milton and Halton Hills. The project will identify the preferred site for the Lower Base Line wastewater pumping station and preferred alignment for the associated wastewater forcemains.

Process

This project will be carried out as a Schedule B MCEA study, in accordance with the requirements of Phases 1 and 2 of the MCEA process, (October 2000, amended 2007, 2011, 2015, and 2023), which is an approved process under Ontario's *Environmental Assessment Act*. Upon completion of this study, design will commence for all aspects of the wastewater pumping station and forcemains.

Public Engagement

Public and review agency consultation is a key element of the MCEA process and input will be sought throughout this study. Details regarding public consultation opportunities will be announced as the study progresses. To learn more about the study and consultation process, please visit the [project webpage on halton.ca](#).

Study Area Map

Upon completion of the MCEA Study, a Project File Report will be prepared, finalized, and made publicly available for review and comment for a minimum of 30 days. The study will follow all legislative requirements and will include consultation with key stakeholders, including the public, Local Municipalities, regulatory agencies and Indigenous Communities.

Comments

If you have any questions or would like to be added to the project mailing list, please contact a Project Manager below. Comments are welcome throughout the duration of the project and will be considered and documented accordingly.
