

Appendix E-5: Notices

**Navy and Water Street
Wastewater Pumping Stations & Collection System
Town of Oakville
Notice of Commencement – Phase 1 and 2
Class Environmental Assessment Study**

Background

In 2012 Halton Region completed the Wastewater Pumping Station Master Plan for the southern portions of the City of Burlington and Town of Oakville. This Master Plan recommended a strategy to eliminate as many pumping stations as possible where there are net positive benefits (financial, social, environmental, or operational) that align with ongoing state of good repair work.

The downtown core of the Town of Oakville has been redeveloping and will continue to be a major area of intensification. The majority of the downtown core area in the Town of Oakville is currently serviced by the Navy Street and Water Street wastewater pumping stations. Halton Region, in conjunction with the local municipalities, has identified this area as a priority area for infill and intensification.

The Study

The Navy Street pumping station currently has capacity constraints and operational issues under normal conditions. A feasibility study was initiated in 2013 to review options to upgrade the Navy Street pumping station as well as the possibility of eliminating pumping stations, in keeping with the recommendations contained in the Pumping Station Master Plan.

The feasibility study concluded that flows to the Navy Street pumping station could be redirected to the nearby Water Street pumping station, eliminating the need for the Navy Street pumping station. Based on the outcomes of the feasibility study, a Phase 1 and 2 Municipal Class Environmental Assessment study is being undertaken to fulfill the requirements in accordance with Schedule B of the Municipal Class Environment Assessment document (October 2000 as amended in 2007 and 2011).

Public Consultation

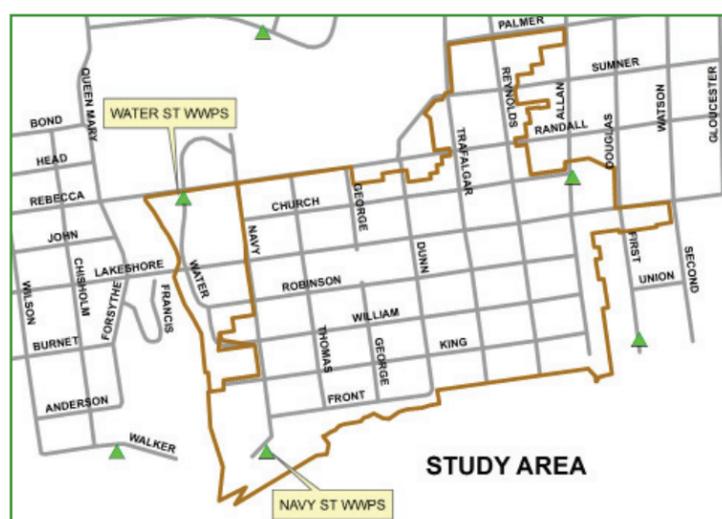

A vital component of this study will involve consultation with interested stakeholders including the public and regulatory agencies. A Public Information Centre will be held (details of PIC will be advertised at a future date) during the process to solicit input and comments from the public. Based on feedback from this PIC, as well as input from review agencies and other stakeholders, the Region and its consultant will prepare and post a Project File for a mandatory review period.

A mailing list for future notification purposes will be kept for this study. If you would like to be added to the list to receive future information about this project, or if you have any questions or comments about the project, please contact either of the individuals identified below. Project information will also be posted on Halton's website at www.halton.ca.

To be placed on the mailing list, or for information requests or questions, please contact either:

Notice Of Public Information Centre Class Environmental Assessment Study Navy and Water Street Wastewater Pumping Stations & Collection System Town of Oakville

The Study

In 2012, Halton Region completed the Wastewater Pumping Station (WWPS) Master Plan for the southern portions of the City of Burlington and Town of Oakville. This Master Plan recommended a strategy to eliminate as many pumping stations as possible where there are net positive benefits (financial, social, environmental, or operational) that align with ongoing state of good repair work. A Schedule B Municipal Class Environmental Assessment Study was initiated in October 2013 to address the capacity constraints and operational concerns at the Navy Street and Water Street wastewater pumping stations and collection system to service the downtown core of the Town of Oakville. This study will fulfill the requirements in accordance with Schedule B of the Municipal Class Environmental Assessment Document (October 2000 as amended in 2007 and 2011).

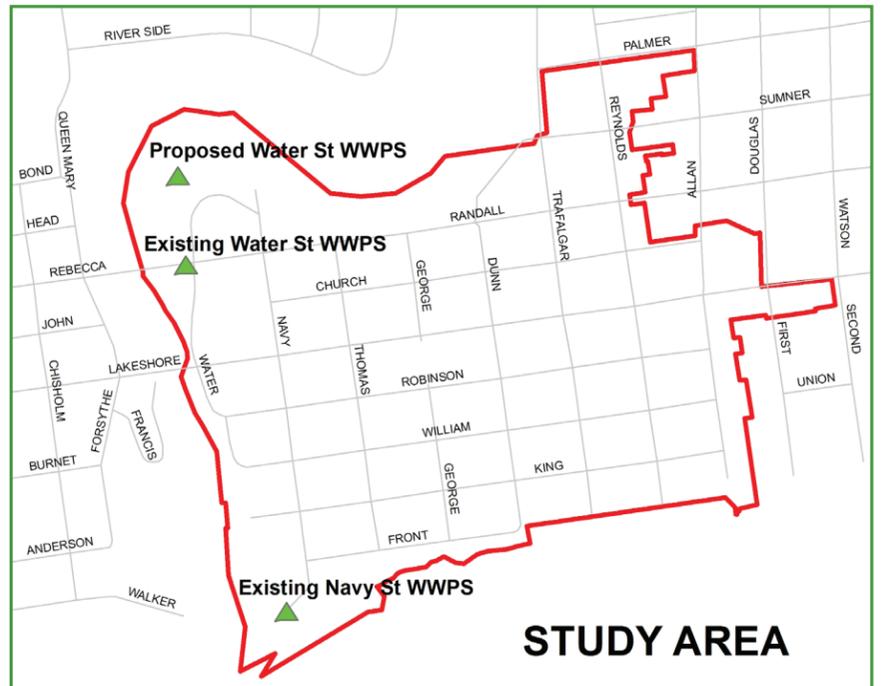

The Process

As part of the study, a Public Information Centre (PIC) is planned to allow the public and interested stakeholders to learn more about the study and provide input and comments on the preliminary preferred alternative. Representatives from the Region and its consultant will be present at the PIC to answer questions and discuss next steps in the study.

Date: Thursday, March 20, 2014
Time: 5:30 – 8:30 pm
Location: Oakville Public Library Central Branch
 120 Navy Street, Oakville, ON

Additional information related to the study and consultation process may be obtained through the study website: Halton.ca/EAs

The map below shows the approximate limits of the study area.

Comments

Comments and information regarding the project are being collected to assist the project team in meeting the requirements of the Class EA process. You are encouraged to attend the PIC and provide comments for the study. Comments received through the course of the study will be considered in the final Project File for this study. With the exception of personal information, all written comments will become part of the public record.

If you are unable to attend, we would still like to hear from you. Please contact either of the project team members listed below if you have questions or comments, wish to obtain more information on the project, or would like to be included on the project contact list:

NOTICE OF COMPLETION

Navy Street and Water Street Wastewater Pumping Stations and Collection System Municipal Class Environmental Assessment Study

Study

Halton Region has completed a Schedule B Class Environmental Assessment Study for Navy Street and Water Street Wastewater Pumping Stations and Collection System in the Town of Oakville. The preferred alternative is to build a new Water Street Wastewater Pumping Station while decommissioning the existing Navy Street and Water Street Wastewater Pumping Stations.

A Public Information Centre was held on Thursday, March 20, 2014 at the Oakville Public Library. Input and comments received from residents and other interested stakeholders were incorporated into the study report (the Project File).

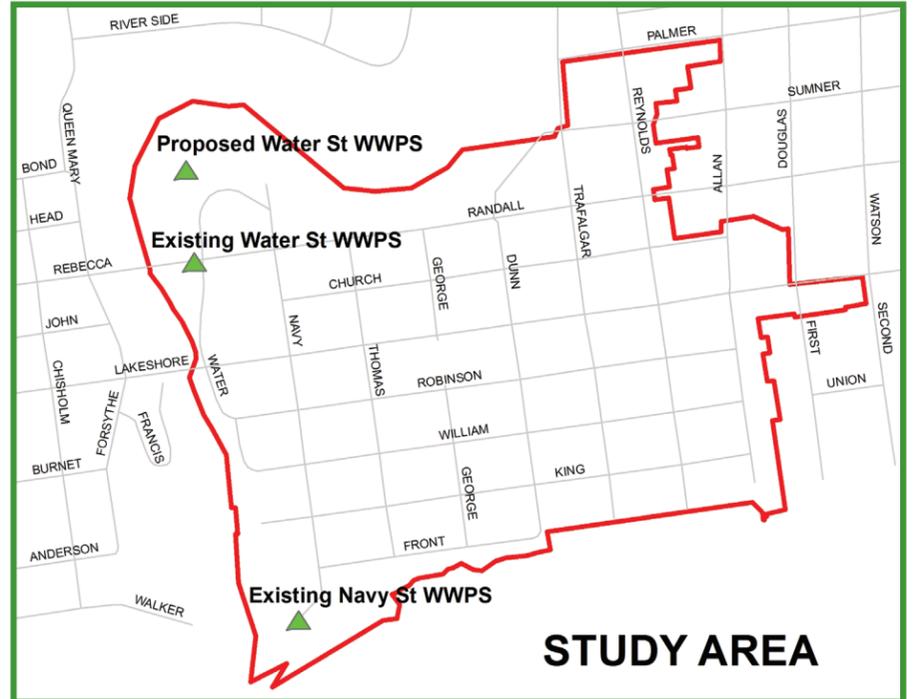

Process

The Notice of Completion and the Project File will be placed on public record for a 30 day review period beginning on May 26, 2014 and ending on June 25, 2014. Halton Region intends to proceed with the implementation, subject to the completion of this study as well as all necessary permits and approvals.

A paper copy of the Project File will be available for public review at the following locations:

<p>Town of Oakville Clerk's Department 1225 Trafalgar Road, Oakville Mon. - Fri. 8:30 am - 4:30 pm</p>	<p>Oakville Public Library - Central 120 Navy Street, Oakville Mon. - Thurs. 9:30 am - 9:00 pm Fri.- Sat. 9:30 am - 5:00 pm Sun. 1:00 pm - 5:00 pm</p>
<p>The Regional Municipality of Halton Citizen's Reference Library, 1151 Bronte Road, Oakville, Mon. - Fri. 8:30 am - 4:30 pm</p>	

The electronic copy of the Project File is also available at the following site:
Halton.ca/EAs

Comments

Please provide any written comments to Halton Region's Project Manager, Mickey Liu by June 25, 2014. If outstanding concerns with this project cannot be resolved in discussion with Halton Region, a person or party may request that the Minister of the Environment make an order for the project to comply with Part II of the Environmental Assessment Act (referred to as a Part II Order). Written Part II Order requests must be submitted to the Minister of the Environment before June 25, 2014 at the following address:

Minister of the Environment
135 St. Clair Avenue West, 12th Floor
Toronto, ON M4V 1P5

A copy of Part II Order requests must also be sent to:
Mickey Liu, P.Eng.
Project Manager,
Halton Region
Phone: 905-825-6000 ext. 7235
E-mail: mickey.liu@halton.ca
