

CLASS ORDER

Made pursuant to section 22(5.0.1) of the
Health Protection and Promotion Act, R.S.O. 1990, c.H.7, as amended

**THIS CLASS ORDER ISSUED AND EFFECTIVE JUNE 16, 2021 AT 12:01 a.m. REPLACES
THE ORDER ISSUED AND EFFECTIVE OCTOBER 5, 2020 AT 12:01 a.m.**

DATE: June 16, 2021

TO: All persons residing or present in The Regional Municipality of Halton¹ (“Halton Region”) who:

- a. Are a confirmed case or probable case of COVID-19;
- b. Have new symptoms (even mild symptoms) or worsening symptoms of COVID-19, have been tested for COVID-19 and are awaiting the results of their test;
- c. Otherwise have reasonable grounds to believe they now have symptoms (even mild symptoms) of COVID-19, or have had such symptoms within the past 10 days;
- d. Are a close contact of a person identified in a. even if they do not themselves have any symptoms of COVID-19;
- e. Have been advised to self-isolate by Halton Region Public Health in circumstances other than those in a., b., c. or d. above; or
- f. Are a parent, or person with responsibilities of a parent, of a person under 16 years of age identified in a., b., c., d. or e. who resides or is present in Halton Region.

NOTES:

- The symptoms of COVID-19 and definitions for “confirmed case”, “probable case” and “close contact” are explained below.
- If you are a person described in f. above, your responsibility is to ensure that this order is complied with. You do not need to self-isolate unless you are a person described in a., b., c., d. or e. above.

I, Dr. Hamidah Meghani, Medical Officer of Health, The Regional Municipality of Halton, ORDER YOU TO TAKE THE FOLLOWING ACTIONS, effective 12:01 a.m. on June 16, 2021:

1. **Isolate yourself immediately** and remain in isolation from all other persons (“self-isolation”).

While in self-isolation you must conduct yourself so you do not expose any another person to infection or possible infection from COVID-19. The instructions you must follow are set out in paragraph 3 below.

2. **Remain in self-isolation:**

- i. **If you are a person described in a. above**, you must remain in self-isolation:

- For 10 days from symptom onset as long as on the 10th day, you have no fever and your symptoms have been improving for at least 24 hours, or 10 days from test date if you have had no symptoms; or
- For 20 days from symptom onset if you have or have had severe illness (i.e., requiring ICU level support) or if you have severe immune compromise as long as on the 20th day, you have no fever and your symptoms have been improving for at least 24 hours or 20 days from your test date if you have had no symptoms.

If you have a fever and/or your other symptoms are not improving on the final day of isolation, contact Halton Region Public Health for direction: 311 (in Halton) or toll-free 1-866-442-5866.

“No fever” means that your temperature is 37.7 degrees Celsius or lower.

¹ Halton Region Health Unit as designated by s.1 and Schedule 11 of R.R.O. 1990, Reg. 553 under the *Health Protection and Promotion Act*

- ii. **If you are a person described in b. above**, you must remain in self-isolation until you receive a negative test result, have no fever and your symptoms have been improving for at least 24 hours. If you receive a positive result, you are then subject to the Order as a person described in a. above.

- iii. **If you are a person described in c. above:**
 - *If tested*, you must remain in self-isolation until you receive a negative test result, have no fever and your symptoms have been improving for at least 24 hours. If you receive a positive result, you are then subject to the Order as a person described in a. above.
 - *If not tested*, you must remain in self-isolation:
 - For 10 days from symptom onset as long as on the 10th day, you have no fever and your symptoms have been improving for at least 24 hours, or 10 days from test date if you have had no symptoms; or
 - For 20 days from symptom onset if you have or have had severe illness (i.e., requiring ICU level support) or if you have severe immune compromise as long as on the 20th day, you have no fever and your symptoms have been improving for at least 24 hours or 20 days from your test date if you have had no symptoms.

- iv. **If you are a person described in d. above**, you must remain in self-isolation for 14 days after the day on which you last had close contact with a person described in paragraph a. above. However, if you develop symptoms during this period, you must:
 - *If tested*, complete the 14 days of self-isolation if you receive a negative test result, and on 14th day have no fever and your symptoms have been improving for at least 24 hours. If you receive a positive result, you are then subject to the Order as a person described in a. above.
 - *If not tested*, remain in self-isolation:
 - For 10 days from symptom onset as long as on the 10th day, you have no fever and your symptoms have been improving for at least 24 hours; or
 - For 20 days from symptom onset if you have or have had severe illness (i.e., requiring ICU level support) or if you have severe immune compromise as long as on the 20th day, you have no fever and your symptoms have been improving for at least 24 hours.

NOTE: Fully vaccinated individuals described in d. above **may** be relieved of the requirement to self-isolate by Halton Region Public Health, if:

- You received your second dose of a two-dose COVID-19 vaccine series, or first dose of a one-dose vaccine series, 14 days or more before the day on which you last had close contact with a person described in paragraph a. above;
- Your vaccine history has been confirmed by Halton Region Public Health;
- You are asymptomatic; and
- You are not a resident of a long-term care or retirement home, a patient admitted to a health care setting, or an individual with an immunocompromising condition (e.g., organ or stem cell transplantation recipients, undergoing chemotherapy or immunosuppressive therapies).

Fully vaccinated individuals who meet these requirements may still be required to self-isolate if Halton Region Public Health has information that links your exposure to a Variant of Concern of the COVID-19 virus for which vaccine effectiveness is not well established.

Even if relieved of the requirement to self-isolate:

- You must report your exposure to your employer and follow any restrictions from work as

specified by your employer;

- If you develop new symptoms (even mild symptoms) of COVID-19, you must:
 - Self-isolate immediately; and
 - Report your symptoms to Halton Region Public Health.

- v. **If you are a person described in e. above**, you must remain in self-isolation for the duration specified by Halton Region Public Health.
- vi. **If you have questions about what you must do**, contact Halton Region Public Health for direction: 311 (in Halton) or toll-free 1-866-442-5866.

3. **The instructions you must follow** during self-isolation are in the Public Health Ontario fact sheet, *How to Self-Isolate* dated October 28, 2020 (or as current), attached as Schedule 1 to this Order.

All instructions in *How to Self-Isolate* (attached) form part of this Order.

This fact sheet may be updated from time to time. You must follow the instructions in the current version attached to this Order as posted at: www.halton.ca/COVID19.

4. **During the periods described in 2. above, remain reachable for monitoring by Halton Region Public Health** and/or other public health staff (defined below).

Inform Halton Region Public Health if you need help to properly self-isolate or while you are self-isolating, e.g., food, water, accommodation, clothing, appropriate medical treatment and family, religious or other arrangements. To do so, contact Halton Region Public Health at: 311 (in Halton) or toll-free 1-866-442-5866.

5. **Seek immediate medical attention if your illness is worsening** (e.g., you have difficulty breathing) by calling 911. Tell them of your COVID-19 diagnosis or symptom(s) and answer all screening questions accurately (including symptom and travel history) so that you will receive appropriate care and the right infection prevention and control precautions are taken.
6. The requirements of this Order are subject to necessary modifications for the following people, who should contact Halton Region Public Health for direction specific to their circumstances (311 in Halton or toll-free 1-866-442-5866):
- i. A person who, in my opinion as Medical Officer of Health, provides an essential service, for the limited purpose of providing that essential service;
 - ii. A person receiving essential medical services or treatments, whether related to COVID-19 or not; or
 - iii. Where a person's self-isolation, in my opinion as Medical Officer of Health, would not be in the public interest.
7. **Provide all information requested and follow any further directions provided to you by Halton Region Public Health** and/or other public health staff pertaining to COVID-19 and the terms of this Order. This includes sharing the names and contact information for all contacts and such other information as may be requested by Halton Region Public Health and/or other public health staff to permit appropriate case and contact management for COVID-19.
8. As provided by section 23 of the *Health Protection and Promotion Act*, the terms of this Order apply to all persons under 16 years of age as served upon their parent(s), and any other person(s) who have the responsibilities of a parent, in relation to the person under 16 years of age, who shall ensure compliance with the Order by the person under 16 years of age.

The reasons for this Order are that:

1. COVID-19, a disease caused by a novel coronavirus, is designated as a disease of public health significance and a communicable disease pursuant to Ontario Regulation 135/18 under the *Health Protection and Promotion Act*.
2. COVID-19 can cause acute and severe respiratory illness in humans.
3. While most people with COVID-19 will recover on their own, complications from COVID-19 can also include serious conditions like pneumonia, cardiovascular disorders or kidney failure and, in some cases, death. People at high risk of such complications include seniors and people with chronic medical conditions, e.g., diabetes, lung problems, immune deficiency and cardiovascular disease.
4. There are no specific treatments for COVID-19; while evidence suggests that vaccines now available may reduce COVID-19 transmission, this is not yet certain and Public Health Ontario continues to monitor the impact of vaccination.
5. The spread of COVID-19 is of immediate and compelling public health importance in Halton Region:
 - a. On January 23, 2020, Halton Region Public Health initiated its Infectious Disease Emergency Response Plan in response to COVID-19;
 - b. On March 11, 2020, the spread of COVID-19 was declared a pandemic by the World Health Organization;
 - c. On March 17, 2020 the spread of COVID-19 was first declared an emergency in Ontario pursuant to the *Emergency Management and Civil Protection Act*, R.S.O. 1990, c.E.9, as amended, on the basis that COVID-19 constitutes a danger of major proportions, and further declarations of emergency have followed; while the Ontario government has since revoked the emergency declaration, emergency orders to address the continued danger presented by the spread of COVID-19 in Ontario remain valid and effective under the *Reopening Ontario (A Flexible Response to COVID-19) Act, 2020*;
 - d. On March 23, 2020, Halton Region declared a State of Emergency in support of Ontario's efforts to contain the spread of the COVID-19 pandemic; Halton Region's Emergency declaration remains in place.
6. As of June 14, 2021, Ontario's Ministry of Health reports:
 - a. 540,426 cases, including 8,974 deaths, for an overall case fatality rate of about 1.7%;
 - b. About 5% of cases have ever been hospitalized;
 - c. Of those hospitalized, about 19% have received ICU care.
7. As of June 14, 2021, Halton Region reports:
 - a. 17,863 cases of COVID-19, including 229 deaths, for an overall case fatality rate of about 1.3%;
 - b. About 4% of cases have ever been hospitalized;
 - c. Of those hospitalized, about 19% have received ICU care.
8. COVID-19 continues to be present in Halton region and continues to pose a risk to the health of the residents of Halton region.
9. The COVID-19 virus is spread from an infected person to a close contact by direct contact or when respiratory secretions from the infected person enter the eyes, nose or mouth of another person. It is now understood to be easily transmitted between people in close and prolonged contact when they are unprotected by appropriate PPE (personal protective equipment).
10. To contain the spread of COVID-19, individuals experiencing one or more symptoms consistent with COVID-19 or who are infected with COVID-19, as well as their close contacts, are required to isolate themselves from other people and remain in isolation until they are no longer infectious or potentially infectious; self-isolation reduces the risk that these people will spread their infection to others.
11. Halton Region and Ontario have now experienced outbreaks and community transmission of Variants of Concern (VOCs) of the COVID-19 virus even in vaccinated individuals. Following public health measures is the best way to protect ourselves against the spread of COVID-19, including VOCs.

I am of the opinion, on reasonable and probable grounds that:

- a. A communicable disease, COVID-19, exists or may exist or there is an immediate risk of an outbreak of this communicable disease in the health unit served by me;
- b. This communicable disease presents a risk to the health of persons in the health unit served by me; and
- c. The requirements specified in this Order are necessary in order to decrease or eliminate the risk to health presented by this communicable disease.

I am also of the opinion that the delivery of notice of this Order to each and every member of the class to whom it is directed is likely to cause a delay that could significantly increase the risk to the health of any person residing in Halton region, so notice shall be provided through the public media and the internet via posting at: www.halton.ca/COVID19.

The following definitions apply to this Order:

"Close contact" means a person who, within the past 14 days, has had a high-risk exposure to a confirmed or probable COVID-19 case. For example, a person who:

- Lived with or otherwise had close, unprotected and prolonged contact, e.g., within 2 metres (6 feet) for more than 15 minutes, with a probable or confirmed case of COVID-19 during their period of communicability;
 - "Unprotected" means without appropriate PPE (personal protective equipment). A non-medical mask or face-covering is not PPE.
- Have been identified by Halton Region Public Health or another public health unit as a close contact of a probable or confirmed case of COVID-19, including in the circumstances of a workplace, school or other outbreak in which close contact may be presumed.

If you have questions about whether you are a "close contact", contact Halton Region Public Health for direction: 311 (in Halton) or toll-free 1-866-442-5866.

"Confirmed case" means a person with a positive laboratory test for COVID-19. For more detail, see the Ministry of Health definition at:

http://health.gov.on.ca/en/pro/programs/publichealth/coronavirus/docs/2019_case_definition.pdf.

"Halton Region Public Health" means the Medical Officer of Health or Halton Region Public Health staff acting under the direction of the Medical Officer of Health.

"Other public health staff" means Public Health Ontario staff and/or such other public health staff as Halton Region Public Health may determine.

"Probable case" means a person without a positive laboratory test for COVID-19 but who is considered likely to be infected with COVID-19 based on symptoms and other factors. For more detail, see the Ministry of Health definition at:

https://www.health.gov.on.ca/en/pro/programs/publichealth/coronavirus/docs/2019_case_definition.pdf

"Severe immune compromise" includes, for example, cancer chemotherapy, untreated HIV infection with CD4 T lymphocyte count <200, combined primary immunodeficiency disorder, taking prednisone >20 mg/day (or equivalent) for more than 14 days and taking other immune suppressive medications.

"Symptoms" of COVID-19 as listed on the Halton Region website, halton.ca/COVID19.

TAKE NOTICE THAT each member of the class to whom this Order is directed is entitled to a hearing by the Health

Services Appeal and Review Board if the member has delivered notice in writing to me (at the address below) and to the Health Services Appeal and Review Board (at 151 Bloor Street West, 9th Floor, Toronto, Ontario, M5S 1S4) requesting a hearing within 15 days after publication of this Order or otherwise in accordance with applicable law. *In the context of the COVID-19 outbreak:*

- All requests for review, submissions, materials, and inquiries should be sent to the Health Services Appeal and Review Board by e-mail to hsarb@ontario.ca or faxed to the Board at 416-327-8524.
- Instead of mail or courier, you may email your request for review to me at: accesshalton@halton.ca. Should you wish to do so, however, please carefully consider the use of electronic communication for sensitive information. Halton Region will use reasonable means to protect your information but, due to the inherent risks of electronic communication, confidentiality cannot be guaranteed.

AND TAKE FURTHER NOTICE THAT although a hearing may be requested this Order takes effect when it is delivered to a member of the class or brought to the attention of a member of the class.

FAILURE TO COMPLY WITH THIS ORDER may result in further legal action being taken against you under sections 36(2), 35, 102 and other relevant provisions of the *Health Protection and Promotion Act*.

FAILURE TO COMPLY WITH THIS ORDER is an offence under sections 100 and 101 of the *Health Protection and Promotion Act* for which you may be liable, on conviction, to a fine of not more than \$5,000.00 (for a person) or \$25,000 (for a corporation) for every day or part of each day on which the offence occurs or continues.

If you have any questions about this Order, please contact Halton Region Public Health by telephone at 311 (in Halton) or toll-free 1-866-442-5866, or by e-mail to accesshalton@halton.ca.

Coronavirus Disease 2019 (COVID-19)

How to Self-Isolate

You must isolate yourself from others if you have COVID-19 symptoms or may have been exposed to COVID-19. If you start to feel worse, contact your health care provider or Telehealth (1-866-797-0000).

Stay home

- Do not go to work, school or other public places.
- Stay home unless you need to get tested or require emergency medical care.
- Do not use public transportation, taxis or rideshares.

Avoid contact with others

- No visitors unless essential (e.g., care providers)
- Stay away from seniors and people with chronic medical conditions (e.g., diabetes, lung problems, immune deficiency).
- As much as possible, stay in a separate room away from other people in your home and use a separate bathroom if you have one.
- Make sure that shared rooms have good airflow (e.g., open windows).
- If these steps are not possible, keep a distance of at least 2 metres from others at all times.

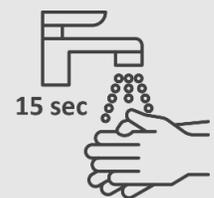

Keep your distance

- If you are in a room with other people, keep a distance of at least 2 metres and wear a mask or face covering that covers your nose and mouth.
- People should wear a mask when they are in the same room as you.

Wash your hands

- Wash your hands often with soap and water.
- Dry your hands with a paper towel or with cloth towel that no one else will share.
- Use an alcohol-based hand sanitizer if soap and water are not available.

Cover your coughs and sneezes

- Cover your mouth and nose with a tissue when you cough or sneeze.
- Cough or sneeze into your upper sleeve or elbow, not your hand.
- Throw used tissues in a lined wastebasket, and wash your hands.
- Lining the wastebasket with a plastic bag makes waste disposal safer.
- Clean your hands after emptying the wastebasket.

Wear a mask over your nose and mouth

- Wear a mask if you must leave your house to see a health care provider or to get tested for COVID-19.
- Wear a mask when you are within 2 metres of other people, or stay in a separate room.
- If you do not have a mask, maintain 2 metres distance from people and cover your cough and sneezes. See [physical distancing](#).

What should I do if I develop symptoms?

- Complete the [COVID-19 Self-Assessment](#).
- Contact Telehealth (1-866-797-0000) or your health care provider if you have questions.
- Anyone with whom you had close physical contact (e.g., in your household) in the two days before your symptoms started or after symptoms started should also self-isolate. If you have questions about this, follow the advice of your [local public health unit](#).
- Your local public health unit or testing provider will tell you how long you need to self-isolate based on your test results and situation.
- When you stop isolating, you should continue with physical distancing measures and wear a mask when unable to maintain 2 metres distance from people outside your household.
- If you are still unwell at the end of your self-isolation period, contact Telehealth or your health care provider.
