A Vibrant Farming Community

The agriculture sector is always evolving and continues to play a critical role in the development of Halton’s economic, environmental and social prosperity. Farms in Halton Region are especially productive due to outstanding soils, favourable climate, freshwater availability, and proximity to urban centres. The 2016 Census of Agriculture revealed some of the ways Halton farmers are adapting their farm practices to become more viable, strengthen the local economy, and employ measures to mitigate the effects of climate change.

Agriculture in Halton means more than food:

- The agriculture and food sector is responsible for approximately 24 per cent of employment in Halton Region.
- Horse and equine farming accounts for over 20 per cent of farms in the region.
- Horticulture, greenhouses, floriculture and nurseries make up 13 per cent of Halton farms.
- Halton is home to Ontario’s largest lavender farm.
- Various agri-tourism and recreational uses are available on Halton farms.

Farm area in Halton and Ontario between 1981 and 2016

Loss of farm area is more pronounced in Halton Region due to development required under the Growth Plan for the Greater Golden Horseshoe.
