

Halton Region Public Health School and Child Care Protocol for Individuals with COVID-19 Symptoms

IMPORTANT: When it is identified that an individual has COVID-19 symptoms, it is important that Halton Region Public Health guidelines, including self-isolation and testing, are followed by the school or child care centre. (Note: the term “individual” refers to a child, student or staff person).

*Schools/Child Care Centres need to **designate a staff member** to care for children/students identified at school/child care with COVID-19 symptoms.
 The **isolation room should be an enclosed space, separate from other people, and equipped with hand sanitizer, tissues, and a lined garbage bin. It should be cleaned and disinfected after each use.
