

# Providing Housing for those with the Greatest Need

WORKING WITH THE PROVINCIAL GOVERNMENT

## Market rentals are out of reach for more and more Ontarians

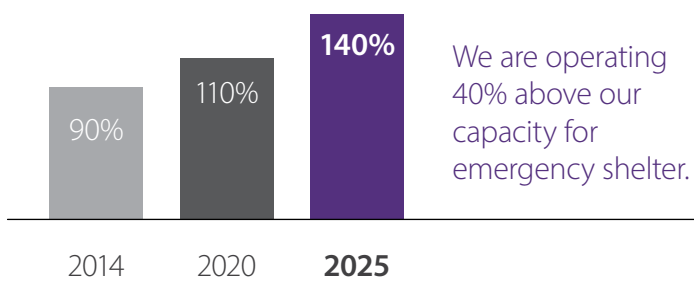

- Across Ontario, average market rent has increased while social assistance programs, like Ontario Works (OW) have remained static
- Halton's Average Monthly Rent is one of the highest in the GTA leaving a growing number of households unable to participate in private market rental housing

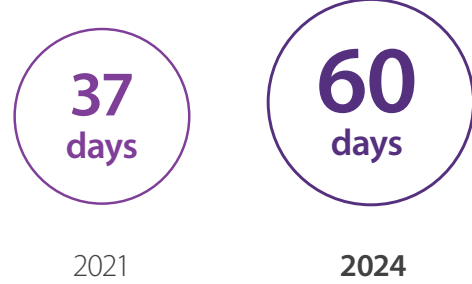

## We are facing increased demands for homelessness services and supports

High market rental costs and the growing mental health and addictions crises are increasing demand for emergency shelter and people are staying in shelters for longer periods of time.

### Demand for emergency shelter

### Average length of stay in emergency shelter

Individuals experiencing homelessness in Halton are struggling with mental health and addictions.

76% are struggling with their mental health

47% are facing substance use issues

165 units of dedicated supportive housing are required to meet current demand in Halton and prevent higher emergency shelter use, street homelessness and encampments.

There is also significant demand for assisted housing in our community.

5,404 existing assisted housing units

8,048 individuals and families on wait list

It will take 11 years to house the current waitlist

## The Provincial Government can support us in delivering housing for those with the greatest need by:

- 1 Increasing Homelessness Prevention Program (HPP) funding
- 2 Increasing coordination across all three levels of government to address the homelessness, mental health and addictions crises
- 3 Partnering with us to get our shovel-ready assisted housing properties built faster

There is opportunity to partner with us to get shovel-ready properties built as fast as possible and deliver more units to meet increasing demand.

Click [here](#) or scan the QR code to learn about our 548 shovel-ready units and 8 projects already in progress.
