

Trafalgar Road Municipal Class Environmental Assessment (MCEA) Public Information Centre #2 – Next Steps (Video 4) – Text Description

Slide 41: Introduction

This video outlines the next steps in the Trafalgar Road Municipal Class Environmental Assessment study.

Slide 42: Next Steps

The Project Team will update the technical studies, including stormwater and drainage, transportation, and natural environment based on the preliminary preferred design to identify impacts.

Preliminary mitigation measures will be recommended in the Environmental Study Report along with commitments for future work.

Measures will be based on Halton Region policies, standards, and best practices, as well as regulatory agency requirements and conditions of approval.

Preliminary mitigation measures will be refined during the future detailed design phase.

Slide 43: Next Steps in the MCEA Study

Following this Public Information Centre, the Project Team will:

- Review and consider feedback from agencies, stakeholders, First Nations and Indigenous Communities and the public;
- Prepare the Environmental Study Report(s) to document the decision-making process and commitments to detailed design;
- Publish the Notice of Completion; and
- Commence the 30-day Environmental Study Report review period.

Your input is very valuable to us. There are two ways to provide feedback on this study:

- By completing the online survey on the study webpage at halton.ca or
- By contacting the Project Team at TrafalgarMCEA@halton.ca.

Please provide your feedback by March 23rd, 2026. If you would like to be added to the study mailing list for the Trafalgar Road MCEA, please contact the Project Team at TrafalgarMCEA@halton.ca.

Thank you for your participation!
