

Providing Housing for those with the Greatest Need

WORKING WITH THE FEDERAL GOVERNMENT

Market rentals are out of reach for more and more Canadians

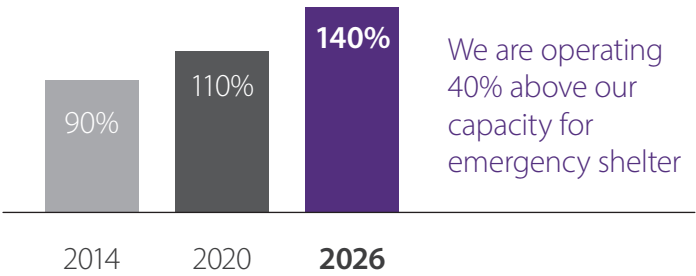

Halton’s Average Monthly Rent is one of the highest in the GTA leaving a growing number of households unable to participate in private market rental housing

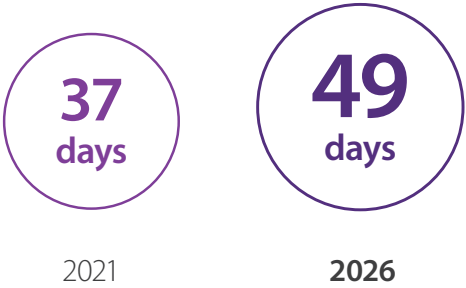

We are facing increased demands for homelessness services and supports

High market rental costs and the growing mental health and addictions crises are increasing demand for emergency shelter and people are staying in shelters for longer periods of time

Demand for emergency shelter

Average length of stay in emergency shelter

Individuals experiencing homelessness in Halton are struggling with mental health and addictions

76% are struggling with their mental health

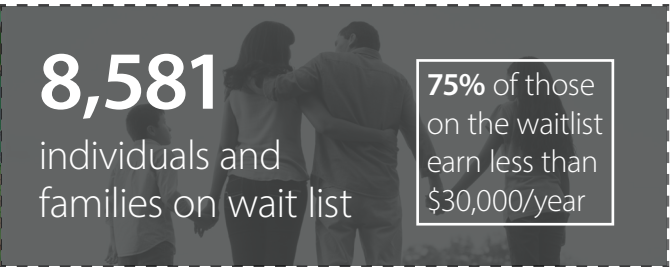

47% are facing substance use issues

In 2024, a third-party consultant report identified a need for **165 units** of dedicated supportive housing to meet demand in Halton and prevent higher emergency shelter use, street homelessness and encampments.

There is also significant demand for assisted housing in our community

It will take **11 years** to house the current waitlist

The Federal Government can support us in delivering housing for those with the greatest need by:

- 1 Providing increased, long-term and predictable capital and operating funding to support individuals and families who are homeless or at risk of homelessness with stable and affordable housing, including increasing funding provided through the Reaching Home and making the program permanent
- 2 Working with the Provincial Government on the renewal of the National Housing Strategy to ensure the continued flow of funding to enable municipalities, including Halton, to increase the supply of assisted and supportive housing, preserve existing housing stock and deliver affordability supports
- 3 Increasing coordination across all three levels of government to address the homelessness, mental health and addictions crises including increasing collaboration with the Ontario Ministry of Health to fund new supportive housing units
- 4 Partnering with us to get our shovel-ready assisted and supportive housing properties built faster including partnering to deliver our portfolio of projects submitted to Build Canada Homes

There is opportunity to partner with us to get shovel-ready properties built as fast as possible and deliver more units to meet increasing demand.
