## Basement Flooding Mitigation Project

### Water Street, Rebecca Street & Mary Street

Sewer back up  
prevention

Wastewater service  
line(s) to property

Notice of Planned Construction – PR-3042W

Summer 2021

#### About This Project

#### IMPROVEMENTS

Halton Region is planning to enhance the wastewater collection system on various streets, within Wards 2 and 3, Town of Oakville, to mitigate basement flooding risks (see attached map). The project area is planned to include Water Street, Rebecca Street and Mary Street. The construction of this project is tentatively scheduled to begin in the summer of 2021. A more detailed letter will be sent once the proposed construction dates are established.

As part of the project design process over the summer and early fall, Halton Region staff will be surveying, locating and marking aboveground and underground infrastructure within this area. ***Please do not disturb or remove any stakes or paint markings from your property. Our staff will remove them once the survey work is completed.***

It may be necessary for our staff to enter your property to determine the elevation of your basement. Your permission will be requested prior to entry. Please note, all Regional staff carries photo identification

**COVID-19 Update:** Regional staff and contractors will be following health and safety guidelines set out by the Province and Public Health to help stop the spread of COVID-19. For more information, please visit [halton.ca](http://halton.ca).
