

Current Health Issues Seminar for Health Professionals

Learning objectives:

Sexually Transmitted Infections

By the end of the session participants will be able to:

- Describe local Sexually Transmitted Infection (STI) trends.
- Follow recommended screening, laboratory diagnostic tests and treatments for STIs, especially chlamydia, gonorrhea and syphilis.
- Follow the Testing and Treatment Guidelines for Gonorrhea in Ontario and effective STI prevention and control measures.

Immunization

By the end of the session participants will be able to:

- Describe local immunization coverage rates for the publicly funded program in Halton for the school-age population and how Halton compares to provincial coverage rates.
- Understand the *Immunization of School Pupils Act* (ISPA) and the importance of reporting immunizations to the Health Department.
- Implement immunization best practices and current guidelines as outlined in the Canadian Immunization Guide recommendations.
