FROM: Dr. Joanna Oda, Associate Medical Officer of Health

DATE: January 7, 2025

RE: Patients could be receiving school suspension notices as Halton enforces the Immunization of School Pupils Act resulting in higher calls to your office

QUICK FACTS

- Halton Region Public Health is enforcing the *Immunization of School Pupils Act* (ISPA) for students born in 2007 to 2012 and 2017 (students in Grades 2, 7, 8, 9, 10, 11, and 12). Students in these cohorts may be suspended from school if their immunization records remain incomplete.
- This month, Public Health is sending suspension notices to families of secondary students and second letters to families of elementary students. Due to delivery delays with Canada Post, suspension notices and second letters may arrive later than expected.
- The suspension period for secondary students with incomplete immunization records will begin on February 13, 2025.
- The suspension period for elementary students with incomplete immunization records will begin on March 27, 2025.
- Continue to use the [School-Based Vaccine Ordering and Reporting Form](#) to order school-based vaccines.

KEY MESSAGES FOR HEALTHCARE PROVIDERS

- Your office may experience an increase in immunization-related requests as parents respond to letters from Public Health related to ISPA enforcement.
- Patients with incomplete immunizations, or lacking adequate documentation of immunization, should be considered unimmunized and started on an immunization schedule appropriate for their age and risk factors. Refer to Catch-up Schedule 2: Children Starting Immunization between 7-17 Years in [Publicly Funded Immunization Schedules for Ontario – June 2022](#).
- If you have questions about a student's record, refer to our [ISPA Resource Guide for Healthcare Professionals](#) or call 311 and ask to speak to an Immunization Nurse.
- Some students may be eligible for medical exemptions based on serologic immunity, clinical diagnosis of disease or a true vaccine contraindication. The [Statement of Medical Exemption form](#) must be filled out by a medical doctor or nurse practitioner.
- Remind families to report their records to public health, especially at the time of immunization, by going to halton.ca/immunize.

KEY MESSAGES FOR PATIENTS

- Parents or guardians are responsible for reporting all their child's immunizations to Public Health, including any school-based vaccines that were not given by Public Health, by visiting [halton.ca/immunize](https://www.halton.ca/immunize).
- Students may have already received the required vaccines during childhood, and the records only need to be reported to Public Health (the student may not need any additional immunizations).
- Families seeking a vaccine exemption due to personal choice must receive a Vaccine Education Certificate and complete a Statement of Conscience or Religious Belief form. Visit [halton.ca/immunize](https://www.halton.ca/immunize) for more information.
- Immunization is the best way to protect your child, family, and community from life-threatening diseases.
