**[CAUTION EXTERNAL EMAIL]** Make Sure that it is legitimate **before** Replying or Clicking on any links

Good morning,

This is a follow-up email about the Halton Hills #4 Wastewater Pumping Station Schedule B Municipal Class Environmental Assessment study. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

As noted in our cover letter dated July 24, 2024, the Region updated the draft Stage 1 Archaeological Assessment completed in October 2023. The revised version incorporates the new limits of the study area and references the findings of the 2021 Stage 1 and 2 Archaeological Assessment completed by The Archaeologist Inc. for the larger property beyond the study area.

Our Cover Letter, Notice of Commencement and the revised draft Stage 1 Archaeological Assessment are attached for further details. The Region welcomes your input on the updated Stage 1 Archaeological Assessment by November 15, 2024, before it is finalized and submitted to the Ministry of Citizenship and Multiculturalism on November 18, 2024.

The Region also updated the Natural Environment study to reflect the new limits of the study area. This study can be provided electronically upon request.

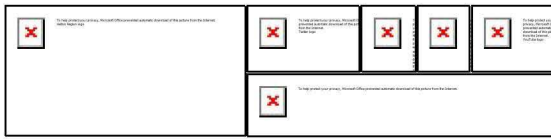

Additionally, please note that moving forward, the Region's contact for this project will be Alexandria Rees, who is copied on this email.

Please do not hesitate to contact her if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

**Subject:** RE: Halton Hills #4 Wastewater Pumping Station Class EA - Notice of Commencement

Good afternoon,

This is a follow-up email about the Notice of Commencement for the Schedule B Municipal Class Environmental Assessment study for the Halton Hills #4 Wastewater Pumping Station. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

In November 2023, Halton Region started an Archaeological Screening Process (ASP) for this wastewater pumping station. However, the ASP was terminated due to changes in the project and planning process.

Our Cover Letter and Notice of Commencement are attached for further details.

Additionally, please note that our consultant's Project Manager is now Jonathan Rudyk, who is copied on this email.

Please feel free to contact me if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

**Subject:** Halton Hills #4 Wastewater Pumping Station Class EA - Notice of Commencement

Good morning,

Halton Region has retained R.V. Anderson Associates Ltd. to assist with the completion of a Schedule B Municipal Class Environmental Assessment (MCEA) study for the new Halton Hills #4 Wastewater Pumping Station. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

In November 2023, Halton Region started an Archaeological Screening Process (ASP) for this wastewater pumping station. However, the ASP was terminated due to changes in the project and planning process.

Please find attached our Cover Letter and Notice of Commencement for further details.

Feel free to contact the undersigned if you have any questions regarding the study.

Best regards,

**Re: Notice of Commencement – Halton Hills #4 Wastewater Pumping Station Municipal Class Environmental Assessment Study – Premier Gateway Employment Area, Town of Halton Hills**

To whom it may concern,

Halton Region provided a Notice of Archaeological Screening Process (ASP) for the Premier Gateway Phase 2B Wastewater Servicing Strategy project on November 6, 2023. Due to changes in the project and the planning process, Halton Region has terminated the ASP for the referenced project. Instead, Halton Region has retained R.V. Anderson Associates Limited to undertake a Municipal Class Environmental Assessment (MCEA) study for the Halton Hills #4 Wastewater Pumping Station to service Phase 2B of the Premier Gateway Employment Area (PGEA) in the Town of Halton Hills. Phase 2B of the PGEA is located north of Steeles Avenue, between Eighth Line North and Winston Churchill Boulevard. Extending municipal water and wastewater services to Phase 2B of the PGEA is crucial to enable the development of this employment area.

The wastewater servicing strategy for Phase 2B of the PGEA was identified in the 2008 South Halton Water and Wastewater Master Plan Update and confirmed in the 2011 Sustainable Halton Water and Wastewater Master Plan. The strategy consists of a new wastewater pumping station close to the intersection of Steeles Avenue and Winston Churchill Boulevard and a combination of gravity sewers and forcemains along Steeles Avenue, connecting to Regional infrastructure at the west end of Phase 2B of the PGEA. The wastewater would then be conveyed to the Mid-Halton Wastewater Treatment Plant.

This MCEA study will consider different site locations for the wastewater pumping station, focusing on feasibility, schedule deliverability, environmental and cultural impacts, land acquisition, coordination with ongoing and future projects and financial implications. This study is being carried out in accordance with Schedule B of the MCEA (October 2000, as amended 2007, 2011, 2015, and 2023), which is an approved process under the Ontario *Environmental Assessment Act*. The study area is shown in the attached Notice of Commencement. The study area for this MCEA study has changed with respect to the one identified for the ASP. This change is shown in Figure 1 at the end of this letter.

The purpose of this letter is to inform the Haudenosaunee Development Institute of the study, as well as to ask for assistance in determining if your Community may hold an interest in this project and if you would like to receive ongoing correspondence as the study progresses. We ask that you inform our project team of any preliminary questions, comments or concerns your Community has related to the MCEA study and the study area.

There will be opportunities for the public and interested parties to learn more about the project at future Public Information Centre (PIC) events. Separate from that process, the project team would like to extend an opportunity to the Haudenosaunee Development Institute to meet with the project team to learn more about the project, if desired. All comments and feedback from the Haudenosaunee Development Institute related to this study are welcome and will be considered throughout the MCEA study.

Upon completion of the MCEA Study, a Project File Report (PFR) will be prepared to document the MCEA Study process, including an inventory of environmental conditions, development and evaluation of

**The Regional Municipality of Halton**

alternative solutions, potential environmental impacts and mitigation measures, and the consultation process. A Notice of Completion will be issued to indicate that the planning process is complete. The PFR will be made publicly available for review and comment for a minimum of 30 days.

### **Archaeological Assessments**

In August 2023, LHC Heritage Planning & Archaeology Inc. conducted a Stage 1 Archaeological Assessment (herein referenced as "2023 Stage 1 AA") to support the ASP. The study area was a one-hectare parcel located within a larger property close to the intersection of Steeles Avenue and Winston Churchill Boulevard. The 2023 Stage 1 AA was completed on behalf of Halton Region to establish the archaeological significance of the proposed wastewater pumping station property and identify any potential archaeological resources (including those of Indigenous descent). In previous correspondence, it was indicated that Halton Region would proceed with a Stage 2 AA, as recommended in the 2023 Stage 1 AA.

After consultations with the Ministry of Citizenship and Multiculturalism (MCM), Halton Region was informed that the subject property was previously assessed in 2021 through a Stage 1 and 2 Archaeological Assessment conducted by The Archaeologist Inc. on behalf of the private landowner (herein referenced as "2021 Stage 1 & 2 AA"). The 2021 Stage 1 & 2 AA study area included the entire property beyond the proposed wastewater pumping station site. The 2021 Stage 1 and 2 AA was not yet entered into the registry when Halton Region conducted its 2023 Stage 1 AA, and therefore, it was not identified nor referenced.

Through correspondence with MCM staff, Halton Region was informed that the 2021 Stage 1 & 2 AA was entered into the registry, and, as such, MCM instructed Halton Region to update the 2023 Stage 1 AA accordingly. Based on the newly available documentation, the study area for the present MCEA study does not retain archaeological potential; therefore, a Stage 2 AA is no longer required.

The Region's subconsultant is revising the 2023 Stage 1 AA to include the new study area and to reference the 2021 Stage 1 & 2 AA. A draft copy of the revised 2023 Stage 1 AA can be provided for your review once it is completed. Halton Region welcomes your input before the revised 2023 Stage 1 AA is finalized and filed with MCM.

If you have any questions or would like to reach the project team directly, please contact Carlos Alonzo Moya, Project Manager, by emailing [carlos.alonzomoya@halton.ca](mailto:carlos.alonzomoya@halton.ca) or by calling 905-825-6000 ext. 7426,. Our project team would be pleased to answer any questions or respond to any concerns you may have.

Sincerely,

Carlos Alonzo Moya, M.A.Sc., P.Eng.

Dear Mr. Daechsel,

I hope this message finds you well.

I am reaching out on behalf of the Haudenosaunee Development Institute regarding the Stage 1 Archaeological Assessment Halton Premier Gateway 2B, part Lot 1, Concession 1, Halton County, now Town of Halton Hills, ON, PIF ID:127091. HDI is within its rights to participate in all stages of this project. Attached, you will find a standard monitoring agreement that we kindly request to be signed prior to the commencement of the work.

Additionally, could you please provide the following information at your earliest convenience?

DATE:

Proponent Name:

Proponent Address:

**Subject: HDI Project Monitoring Agreement for (Project Name and Project Address)**

This monitoring agreement (this “Agreement”) is entered into by (Proponent Name) and Haudenosaunee Development Institute (“HDI”). The purpose of this Agreement is for (Proponent Name), to meet engagement obligations, including capacity funding for project review, assessment, analysis and monitoring for the Project in accordance with the Rates set out at Schedule A attached hereto.

**Note: This Agreement by itself does not constitute consultation, engagement, and/or consent for the subject Project.**

This Agreement allows HDI to provide timely and meaningful comment with respect to upholding commitments and responsibilities arising from Haudenosaunee instruments including but not limited to our Opening Address referred to in Kanien’kéha (Mohawk) as the Ohén:ton Karihwatéhkwen. It is understood and acknowledged that all work on the Project will be undertaken in accordance with applicable industry standard requirements, protocols, thresholds, and practices. The terms contained in this Agreement are binding only to this Agreement.

Subject to the below terms and conditions, (Proponent Name) and HDI (collective, the “Parties”) hereby agree that (Proponent Name) will provide capacity funding, at the sole expense of (Proponent Name) for the services on the terms set forth herein.

In addition, the Parties agree that the Monitors will be reimbursed for mileage and meals in accordance with the Canada Treasury Board Guidelines. Amounts invoiced by HDI in accordance with Schedule A shall be payable to the **Haudenosaunee Development Institute** at the following:

Bank #: 001

Transit # 37522

Bank Account #: 1100-241

Email address for remittance – [rae@hdito.com](mailto:rae@hdito.com), [aaron@detlorlaw.com](mailto:aaron@detlorlaw.com)

The Monitors selected by HDI shall have appropriate qualifications for the work required including training in monitoring, as set forth in **Schedule A**. Upon request by (Proponent Name), HDI or the applicable Monitors shall provide written evidence of such Monitor’s qualifications to (Proponent

---

OUR LAND, OUR LAW, OUR PEOPLE, OUR FUTURE

Name). **Schedule B** is provided by HDI to (Proponent Name) and serves as the geographic and legal rights that that Haudenosaunee Confederacy Chiefs Council (HCCC) hold over the territory that Project Name operates within.

1. The amount billed by HDI in respect of the Monitoring work shall not exceed the amounts indicated in **Schedule A**, attached hereto, with the exception of section 20 of this Agreement.
2. Any issues arising from this Agreement that requires the approval of both Parties, shall be brought to an Issues Management Committee (the “Committee”). The Committee shall be struck within 5 business days or less, and consensus will be sought. The members of the Committee are as follows and can be delegated to other members of their respective organization:

Aaron Detlor  
aaron@detlorlaw.ca

Proponent Contact Name  
Proponent Contact Info (phone # and email address)

3. The Parties agree that the Monitors are not employees, contractors, or sub-contractors of (Proponent Name) or their consultant(s) and that the Monitors will be responsible for their own personal protective equipment, such as hard hats, safety boots and safety vests unless specific or otherwise unique personal protective equipment is required, in which case will be provided or reimbursed by (Proponent Name).
4. All Monitors shall comply with the personal protective equipment requirements on the Project site. Monitors shall follow the reasonable instructions of (Proponent Name) and their consultant(s) conducting the work concerning safety practices and the Monitors will attend “tailgate” safety meetings if requested.
5. Any costs associated with required special or additional training of HDI Monitors shall be borne by Project Name at the hourly rates specified in the Agreement.
6. If its use is deemed necessary by both parties, Project Name agrees to reimburse the Monitor for their use of the 407ETR, all inclusive fees, within 60 days of receipt of invoice including a copy of the bill.
7. (Project Name) shall provide payment for the cost of overnight accommodation for the Monitors participating in monitoring at locations that would otherwise require more than 90

minutes of travel time at both the beginning and end of the workday, as determined using the HDI office as place of departure.

8. (Project Name) will pay the Monitor a minimum for four (4) hours, plus travel time and mileage when fieldwork has been cancelled either while travelling to site or upon arrival.
9. (Project Name) or the (Project Consultant) will coordinate site meeting locations and times directly with HDI's field supervisors. The contact information for the HDI field supervisors is as follows:

**Archaeology**

Adam Zachariah

(647) 526-4704

[adamzachariah@detlorlaw.com](mailto:adamzachariah@detlorlaw.com)

**Environmental**

Rae Lumsdon

(416)839-5307

[rae@hdito.com](mailto:rae@hdito.com)

10. (Proponent Name) will provide payment by cheque or bank transfer within thirty (30) days upon receipt of an undisputed invoice. Invoices will explain in reasonable detail each Monitors time, fees, mileage and meal expenses and the nature and date of work performed.

All invoices should be addressed directly to (Proponent Name) , the (Proponent Name) and purchase order if required should be noted in the text of each invoice.

Fees, invoices, and/or disbursements remaining unpaid after thirty (30) days the invoice is delivered will earn interest at two (2%) percent per month or 26.82% per annum.

Invoices to be submitted to the following:

Rae Lumsdon

[rae@hdito.com](mailto:rae@hdito.com)

And copied to any Licensed Archaeologist involved in the Project at:

Archaeologist Name

Archaeologist Address

Archaeologist Email

Licensee #:

11. (Project Name) is not responsible for any direct or indirect damage or harm caused by HDI and vice versa.

12. This Agreement shall remain in place for the duration of the Project Development.

**13. This Agreement may be terminated by HDI upon thirty (30) days written notice to the other party. Electronic communications constitute written notice.**

Rae Lumsdon  
[rae@hdito.com](mailto:rae@hdito.com)

Project Contact Name

Project Contact Email

Proponent Name

Proponent Email

14. HDI pays Workplace Safety and insurance Board (“WSIB”) contributions in respect of the Monitors and will, at its own expense, maintain for the term of this agreement a comprehensive general liability (“CGL”) policy or policies with a limit of at least \$5 million and shall provide Project Name with evidence of such insurance within 30 days of the signing of this agreement.

15. The Parties agree that this Agreement and any amendments thereto, if any, constitute the entire agreement between the Parties as to the matters governed hereby and supersede and replaces all prior arrangements, agreements, or understandings with respect to such matters.

16. Each Party represents and warrants to the other that its undersigned signatories are authorized to execute this agreement on behalf of the respective Party.

17. Both parties will comply with the Occupational Health and Safety Act, R.S.O 1990, C. 0.1, the Ontario Human Rights Code, R.S.O. 1990, c. H.19, and maintain a safe, harassment-free work environment. Nothing in this Agreement subjugates HDI to this legislation.

18. If, in the event that Indigenous artifacts are discovered, (Proponent Name) agrees to work with HDI to facilitate site visits to allow for the assessment of the heritage value by HDI, and in accordance with the applicable legislation, guidelines and standards that govern provincially licensed archaeologists. (Project Name ) acknowledges that at times, additional delegates may need to be brought to the site for their relevant expertise from the regions where HDI currently conducts their day-to-day business operations, provided such delegates are approved in advance by Project Name

(Proponent Name) further acknowledges that it is their preference that all work ceases on an affected area within a site until HDI are able to conduct its heritage value assessment.

19. If HDI is of the view, that designated HDI staff are unable to complete a comprehensive technical review of Project materials. (Proponent Name) agrees to pay costs approved in advance in writing by (Proponent Name) incurred by HDI to retain an external expert in the appropriate field to be chosen at HDI's sole discretion. The Parties agree that a review by an external expert will only commence following mutual acceptance by both Parties of the external expert selected and an estimate of work and budget provided by the expert. The Issues Management Committee will determine this funding request and will be accepted if reasonable in order to fulfill (Proponent Name's) legal obligations.

20. HDI and (Proponent Name) agree to keep all information pertaining to or arising from this Agreement confidential at all times after the date of this Agreement, and not directly or indirectly reveal, disclose or use for its own or any other purposes any information received or obtained as a result of entering into or performing, or supplied by or on behalf of (Proponent Name) in the negotiations leading to or during the term of this Agreement.

21. HDI acknowledges that (Proponent Name) may be an institution to which the Freedom of Information and Protection of Privacy Act (Ontario) (hereinafter, "FIPPA") applies and may have to disclose information relating to this Agreement in the event of an access request made under FIPPA, with the exception of the protection of Indigenous knowledge as laid out in s. 15.1 of the same Act.

22. This Agreement may be executed in counterparts (in either original or electronic form), each of which will be deemed to be an original and all of which when taken together will constitute the same agreement.

**Subject:** HDI Engagement - Halton Premier Gateway 2B, part Lot 1 Response

Hi Emma,

Thank you for contacting Hugh Daechsel at LHC on August 20<sup>th</sup> expressing the Haudenosaunee Development Institute's interest in Halton Region's Stage 1 Archaeological Assessment Halton Premier Gateway Phase 2B, part Lot 1, Concession 1, Halton County, now Halton Hills, ON, PIF ID:127091. My name is Jonathan Rudyk, I am the project manager for R.V. Anderson, and we are conducting this Stage 1 AA as part of a Schedule B Class EA for the area. The Class EA is for a new wastewater pumping station.

RVA understands that Halton Region is in active discussion with HDI regarding agreements related to archaeological work. For more information about the project and the associated participation agreement, feel free to contact Carlos Alonzo Moya at [Carlos.AlonzoMoya@halton.ca](mailto:Carlos.AlonzoMoya@halton.ca) . Once an agreement has been reached, we can discuss scheduling a meeting.

While no field work is anticipated for this project, please be advised that any persons attending a project site must have an executed Agreement with The Regional Municipality of Halton.

Thanks,

**Jonathan Rudyk, P. Eng** (he/him)

Kwe Benjamin,

I hope you are doing well.

I am following up on the review status of the 2021 Stage 1 and 2 Archaeological Assessment. The Region welcomes your input on this document by December 13, 2024, before the Stage 1 Archaeological Assessment that you previously reviewed, is finalized and submitted to the Ministry of Citizenship and Multiculturalism on December 16, 2024.

If you have any questions or concerns, please let me know.

Thank you,  
Alex

Kwe Benjamin,

My name is Alex Rees, and I will be taking over the Halton Hills #4 Wastewater Pumping Station Class EA for Carlos as he has moved onto another role outside of the Halton Region.

Thank you for providing Huron-Wendat Nation's comments on the revised Draft Stage 1 Archaeological Assessment.

As requested, please see the attached 2021 Stage 1 and 2 Archaeological Assessment for review. This report was previously submitted and registered with the Ministry of Citizenship and Multiculturalism after its completion.

If there are any additional comments or feedback, please send these to me by Monday, December 2<sup>nd</sup>, 2024. If this is not possible, please let me know.

Thank you,  
Alex

**Objet :** RE: Halton Hills #4 Wastewater Pumping Station Class EA - Notice of Commencement

Kwe Benjamin,

I hope you are doing well.

This is a follow-up email about the Halton Hills #4 Wastewater Pumping Station Schedule B Municipal Class Environmental Assessment study. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

As noted in our cover letter dated July 24, 2024, the Region updated the draft Stage 1 Archaeological Assessment completed in October 2023. The revised version incorporates the new limits of the study area and references the findings of the 2021 Stage 1 and 2 Archaeological Assessment completed by The Archaeologist Inc. for the larger property beyond the study area.

Our Cover Letter, Notice of Commencement and the revised draft Stage 1 Archaeological Assessment are attached for further details. The Region welcomes your input on the updated Stage 1 Archaeological Assessment by November 15, 2024, before it is finalized and submitted to the Ministry of Citizenship and Multiculturalism on November 18, 2024.

The Region also updated the Natural Environment study to reflect the new limits of the study area. This study can be provided electronically upon request.

Additionally, please note that moving forward, the Region's contact for this project will be Alexandria Rees, who is copied on this email.

Please do not hesitate to contact her if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

Kwe Carlos,

Sorry for the delay in responding to the first email, I am still adjusting to my new role. It was a pleasure to meet with you and your team last Monday. As we discussed, the Huron-Wendat Nation is interested in getting involved in the review of all archaeology studies in the region.

In that respect, we appreciate that you sent the Notice of Commencement with a clear summary of the project's developments and details on the state of the archaeological assessments.

We are interested in having our archaeology analyst review the updated Stage 1 report once the draft is completed. I attached a quote for provision of capacity funding that will allow us to mobilize our resources for this task.

If there is anything you can contact me.  
I look forward to continuing our collaboration,

You don't often get email from [carlos.alonzomoya@halton.ca](mailto:carlos.alonzomoya@halton.ca). [Learn why this is important](#)

Good afternoon,

This is a follow-up email about the Notice of Commencement for the Schedule B Municipal Class Environmental Assessment study for the Halton Hills #4 Wastewater Pumping Station. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

In November 2023, Halton Region started an Archaeological Screening Process (ASP) for this wastewater pumping station. However, the ASP was terminated due to changes in the project and planning process.

Our Cover Letter and Notice of Commencement are attached for further details.

Additionally, please note that our consultant's Project Manager is now Jonathan Rudyk, who is copied on this email.

Please feel free to contact me if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

**Subject:** Halton Hills #4 Wastewater Pumping Station Class EA - Notice of Commencement

Good morning,

Halton Region has retained R.V. Anderson Associates Ltd. to assist with the completion of a Schedule B Municipal Class Environmental Assessment (MCEA) study for the new Halton Hills #4 Wastewater Pumping Station. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

In November 2023, Halton Region started an Archaeological Screening Process (ASP) for this wastewater pumping station. However, the ASP was terminated due to changes in the project and planning process.

Please find attached our Cover Letter and Notice of Commencement for further details.

Feel free to contact the undersigned if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

**Re: Notice of Commencement – Halton Hills #4 Wastewater Pumping Station Municipal Class Environmental Assessment Study – Premier Gateway Employment Area, Town of Halton Hills**

To whom it may concern,

Halton Region provided a Notice of Archaeological Screening Process (ASP) for the Premier Gateway Phase 2B Wastewater Servicing Strategy project on November 6, 2023. Due to changes in the project and the planning process, Halton Region has terminated the ASP for the referenced project. Instead, Halton Region has retained R.V. Anderson Associates Limited to undertake a Municipal Class Environmental Assessment (MCEA) study for the Halton Hills #4 Wastewater Pumping Station to service Phase 2B of the Premier Gateway Employment Area (PGEA) in the Town of Halton Hills. Phase 2B of the PGEA is located north of Steeles Avenue, between Eighth Line North and Winston Churchill Boulevard. Extending municipal water and wastewater services to Phase 2B of the PGEA is crucial to enable the development of this employment area.

The wastewater servicing strategy for Phase 2B of the PGEA was identified in the 2008 South Halton Water and Wastewater Master Plan Update and confirmed in the 2011 Sustainable Halton Water and Wastewater Master Plan. The strategy consists of a new wastewater pumping station close to the intersection of Steeles Avenue and Winston Churchill Boulevard and a combination of gravity sewers and forcemains along Steeles Avenue, connecting to Regional infrastructure at the west end of Phase 2B of the PGEA. The wastewater would then be conveyed to the Mid-Halton Wastewater Treatment Plant.

This MCEA study will consider different site locations for the wastewater pumping station, focusing on feasibility, schedule deliverability, environmental and cultural impacts, land acquisition, coordination with ongoing and future projects and financial implications. This study is being carried out in accordance with Schedule B of the MCEA (October 2000, as amended 2007, 2011, 2015, and 2023), which is an approved process under the Ontario *Environmental Assessment Act*. The study area is shown in the attached Notice of Commencement. The study area for this MCEA study has changed with respect to the one identified for the ASP. This change is shown in Figure 1 at the end of this letter.

The purpose of this letter is to inform the Huron-Wendat Nation of the study, as well as to ask for assistance in determining if your Community may hold an interest in this project and if you would like to receive ongoing correspondence as the study progresses. We ask that you inform our project team of any preliminary questions, comments or concerns your Community has related to the MCEA study and the study area.

There will be opportunities for the public and interested parties to learn more about the project at future Public Information Centre (PIC) events. Separate from that process, the project team would like to extend an opportunity to the Huron-Wendat Nation to meet with the project team to learn more about the project, if desired. All comments and feedback from the Huron-Wendat Nation related to this study are welcome and will be considered throughout the MCEA study.

Upon completion of the MCEA Study, a Project File Report (PFR) will be prepared to document the MCEA Study process, including an inventory of environmental conditions, development and evaluation of alternative solutions, potential environmental impacts and mitigation measures, and the consultation

**The Regional Municipality of Halton**

process. A Notice of Completion will be issued to indicate that the planning process is complete. The PFR will be made publicly available for review and comment for a minimum of 30 days.

### **Archaeological Assessments**

In August 2023, LHC Heritage Planning & Archaeology Inc. conducted a Stage 1 Archaeological Assessment (herein referenced as “2023 Stage 1 AA”) to support the ASP. The study area was a one-hectare parcel located within a larger property close to the intersection of Steeles Avenue and Winston Churchill Boulevard. The 2023 Stage 1 AA was completed on behalf of Halton Region to establish the archaeological significance of the proposed wastewater pumping station property and identify any potential archaeological resources (including those of Indigenous descent). In previous correspondence, it was indicated that Halton Region would proceed with a Stage 2 AA, as recommended in the 2023 Stage 1 AA.

After consultations with the Ministry of Citizenship and Multiculturalism (MCM), Halton Region was informed that the subject property was previously assessed in 2021 through a Stage 1 and 2 Archaeological Assessment conducted by The Archaeologist Inc. on behalf of the private landowner (herein referenced as “2021 Stage 1 & 2 AA”). The 2021 Stage 1 & 2 AA study area included the entire property beyond the proposed wastewater pumping station site. The 2021 Stage 1 and 2 AA was not yet entered into the registry when Halton Region conducted its 2023 Stage 1 AA, and therefore, it was not identified nor referenced.

Through correspondence with MCM staff, Halton Region was informed that the 2021 Stage 1 & 2 AA was entered into the registry, and, as such, MCM instructed Halton Region to update the 2023 Stage 1 AA accordingly. Based on the newly available documentation, the study area for the present MCEA study does not retain archaeological potential; therefore, a Stage 2 AA is no longer required.

The Region’s subconsultant is revising the 2023 Stage 1 AA to include the new study area and to reference the 2021 Stage 1 & 2 AA. A draft copy of the revised 2023 Stage 1 AA can be provided for your review once it is completed. Halton Region welcomes your input before the revised 2023 Stage 1 AA is finalized and filed with MCM.

If you have any questions or would like to reach the project team directly, please contact Carlos Alonzo Moya, Project Manager, by emailing [carlos.alonzomoya@halton.ca](mailto:carlos.alonzomoya@halton.ca) or by calling 905-825-6000 ext. 7426,. Our project team would be pleased to answer any questions or respond to any concerns you may have.

Sincerely,

Carlos Alonzo Moya, M.A.Sc., P.Eng.

Kwe Benjamin,

I hope you are doing well.

This is a follow-up email about the Halton Hills #4 Wastewater Pumping Station Schedule B Municipal Class Environmental Assessment study. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

As noted in our cover letter dated July 24, 2024, the Region updated the draft Stage 1 Archaeological Assessment completed in October 2023. The revised version incorporates the new limits of the study area and references the findings of the 2021 Stage 1 and 2 Archaeological Assessment completed by The Archaeologist Inc. for the larger property beyond the study area.

Our Cover Letter, Notice of Commencement and the revised draft Stage 1 Archaeological Assessment are attached for further details. The Region welcomes your input on the updated Stage 1 Archaeological Assessment by November 15, 2024, before it is finalized and submitted to the Ministry of Citizenship and Multiculturalism on November 18, 2024.

The Region also updated the Natural Environment study to reflect the new limits of the study area. This study can be provided electronically upon request.

Additionally, please note that moving forward, the Region's contact for this project will be Alexandria Rees, who is copied on this email.

Please do not hesitate to contact her if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

Kwe Carlos,

Sorry for the delay in responding to the first email, I am still adjusting to my new role. It was a pleasure to meet with you and your team last Monday. As we discussed, the Huron-Wendat Nation is interested in getting involved in the review of all archaeology studies in the region.

In that respect, we appreciate that you sent the Notice of Commencement with a clear summary of the project's developments and details on the state of the archaeological assessments.

We are interested in having our archaeology analyst review the updated Stage 1 report once the draft is completed. I attached a quote for provision of capacity funding that will allow us to mobilize our resources for this task.

If there is anything you can contact me.  
I look forward to continuing our collaboration,

Electronic Record and Signature Disclosure		

## **ELECTRONIC RECORD AND SIGNATURE DISCLOSURE**

Described below are the terms and conditions of The Regional Municipality of Halton (the “Region”) transacting with you electronically through the DocuSign system. Please read the information below carefully and thoroughly, and if you can access this information electronically to your satisfaction and agree to this Electronic Record and Signature Disclosure (“ERSD”), please confirm your agreement by selecting the check-box next to ‘I agree to use electronic records and signatures’ before clicking ‘CONTINUE’ within the DocuSign system.

### **Getting paper copies**

You will have the ability to download and print documents we send to you through the DocuSign system during and immediately after the signing session and, if you elect to create a DocuSign account, you may access the documents at any time. If you instead wish for us to send you paper copies of any such documents from our office to you, you will be charged a \$0.20 per-page fee or such other fee allowed under the Region’s most current User Fees and Charges By-law. To request delivery from us of paper copies of documents previously provided by us to you electronically, you must send us an email to [accesshalton@halton.ca](mailto:accesshalton@halton.ca) and in the body of such request you must state your email address, full name, mailing address, telephone number and information about the signed document such as type of document, contact from Halton Region, timeframe of signing etc. We will bill you for any fees at that time, if any.

### **Required hardware and software**

The minimum system requirements for using the DocuSign system may change over time. The current system requirements are found here: <https://support.docusign.com/guides/signer-guide-signing-system-requirements>

### **Acknowledging your access and consent to receive and sign documents electronically**

To confirm to us that you can access this information electronically, please confirm that you have read this ERSD, and

- (i) that you are able to print on paper or electronically save this ERSD for your future reference and access; or
- (ii) that you are able to email this ERSD to an email address where you will be able to print on paper or save it for your future reference and access.

Further, if you consent to receiving documents exclusively in electronic format as described herein, then select the check-box next to ‘I agree to use electronic records and signatures’ before clicking ‘CONTINUE’ within the DocuSign system.

By selecting the check-box next to 'I agree to use electronic records and signatures', you confirm that:

- You can access and read this Electronic Record and Signature Disclosure; and
- You can print on paper this Electronic Record and Signature Disclosure, or save or send this Electronic Record and Disclosure to a location where you can print it, for future reference and access; and
- You consent to receive exclusively through electronic means all documents sent in this DocuSign envelope to you by the Region using the DocuSign software.

**Subject: Huron-Wendat Nation comments on the revised draft Stage 1 Archaeological Assessment for the Halton Hills #4 Wastewater Pumping Station**

---

Mr. Alonzo Moya,

This letter refers to the subject above and follows the Notice of Commencement addressed to the Huron-Wendat Nation on July 24, 2024.

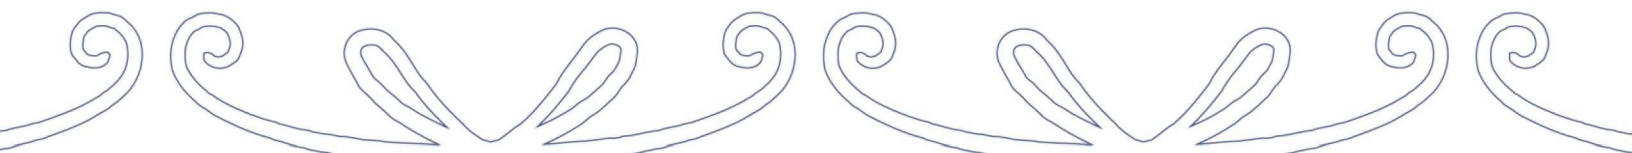

Regarding this consultation, the Huron-Wendat Nation wishes to submit some more specific comments. Please find them in the annex below.

We ask that the recommended modifications be made before submission to the Ministry of Citizenship and Multiculturalism.

If you have any questions, please address them directly to Benjamin Labbé, at Benjamin.Labbe@wendake.ca.

Please accept, Mr. Alonzo Moya, assurances of my highest consideration.

Vincent Bourret  
Director of the Bureau du Nionwentsïo

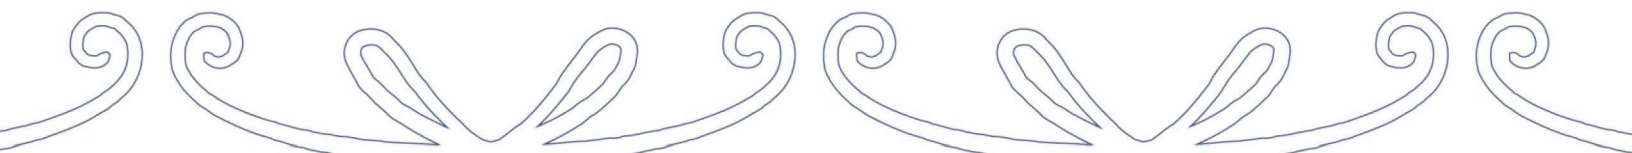

## Annex 1 – Specific comments on the consultation

Some elements of the historical context would benefit from further elaboration. On page 8, it is written: “The Huron/Wyandot who, by the mid-17<sup>th</sup> century, had occupied areas around Lake Simcoe and along the south end of Georgian Bay, were dispersed by the Iroquois from south of Lake Ontario.” The phrasing is not clear and could suggest that the Wendat were dispersed from the south of Lake Ontario, whereas this passage is meant to indicate that the Iroquois came from the south of Lake Ontario.

Later, it is written: “The Attawandaron (Neutral), at the west end of Lake Ontario, were similarly displaced by 1650 and the St. Lawrence Iroquois, encountered by Cartier at Hochelaga (Montreal), had completely disappeared by the time of Champlain’s arrival to the region at the beginning of the 17<sup>th</sup> century.” Information on the St. Lawrence Iroquoians could be more detailed in the report, especially considering the growing amount of evidence that they were linked to communities in Ontario. There are also plenty of theories regarding their disappearance from the St. Lawrence Valley. A discussion on this topic would enrich the report.

On page 13, it is written: “Between 1649 and 1655, the Haudenosaunee Confederacy waged warfare on the Huron, Petun, and Attiwandaron, pushing them out of their villages and the general area (Mississaugas of the Credit First Nation [MCFN2] 2018).” This section could provide more details on the event and be supported by sources external to a specific Nation.

Finally, we would like to investigate further on the recommendations of the report. Considering that the *draft revised Stage 1* bases its conclusion on *The Archaeologists Inc. 2021 Stage 1-2 assessment*, we would like to review this report. This verification is especially relevant given that the *draft revised Stage 1* conclusion is said to be inferred from a relation that is not explicit in the *2021 Stage 1-2* report.

Good morning, Adam,

I hope you are doing well.

This is a follow-up email about the Halton Hills #4 Wastewater Pumping Station Schedule B Municipal Class Environmental Assessment study. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

As noted in our cover letter dated July 24, 2024, the Region updated the draft Stage 1 Archaeological Assessment completed in October 2023. The revised version incorporates the new limits of the study area and references the findings of the 2021 Stage 1 and 2 Archaeological Assessment completed by The Archaeologist Inc. for the larger property beyond the study area.

Our Cover Letter, Notice of Commencement and the revised draft Stage 1 Archaeological Assessment are attached for further details. The Region welcomes your input on the updated Stage 1 Archaeological Assessment by November 15, 2024, before it is finalized and submitted to the Ministry of Citizenship and Multiculturalism on November 18, 2024.

The Region also updated the Natural Environment study to reflect the new limits of the study area. This study can be provided electronically upon request.

Additionally, please note that moving forward, the Region's contact for this project will be Alexandria Rees, who is copied on this email.

Please do not hesitate to contact her if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

**[CAUTION EXTERNAL EMAIL]** Make Sure that it is legitimate **before** Replying or Clicking on any links

Good morning,

This is a follow-up email about the Halton Hills #4 Wastewater Pumping Station Schedule B Municipal Class Environmental Assessment study. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

As noted in our cover letter dated July 24, 2024, the Region updated the draft Stage 1 Archaeological Assessment completed in October 2023. The revised version incorporates the new limits of the study area and references the findings of the 2021 Stage 1 and 2 Archaeological Assessment completed by The Archaeologist Inc. for the larger property beyond the study area.

Our Cover Letter, Notice of Commencement and the revised draft Stage 1 Archaeological Assessment are attached for further details. The Region welcomes your input on the updated Stage 1 Archaeological Assessment by November 15, 2024, before it is finalized and submitted to the Ministry of Citizenship and Multiculturalism on November 18, 2024.

The Region also updated the Natural Environment study to reflect the new limits of the study area. This study can be provided electronically upon request.

Additionally, please note that moving forward, the Region's contact for this project will be Alexandria Rees, who is copied on this email.

Please do not hesitate to contact her if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

**Re: Notice of Commencement – Halton Hills #4 Wastewater Pumping Station Municipal Class Environmental Assessment Study – Premier Gateway Employment Area, Town of Halton Hills**

Dear Mr. LaForme,

Halton Region provided a Notice of Archaeological Screening Process (ASP) for the Premier Gateway Phase 2B Wastewater Servicing Strategy project on November 6, 2023. Due to changes in the project and the planning process, Halton Region has terminated the ASP for the referenced project. Instead, Halton Region has retained R.V. Anderson Associates Limited to undertake a Municipal Class Environmental Assessment (MCEA) study for the Halton Hills #4 Wastewater Pumping Station to service Phase 2B of the Premier Gateway Employment Area (PGEA) in the Town of Halton Hills. Phase 2B of the PGEA is located north of Steeles Avenue, between Eighth Line North and Winston Churchill Boulevard. Extending municipal water and wastewater services to Phase 2B of the PGEA is crucial to enable the development of this employment area.

The wastewater servicing strategy for Phase 2B of the PGEA was identified in the 2008 South Halton Water and Wastewater Master Plan Update and confirmed in the 2011 Sustainable Halton Water and Wastewater Master Plan. The strategy consists of a new wastewater pumping station close to the intersection of Steeles Avenue and Winston Churchill Boulevard and a combination of gravity sewers and forcemains along Steeles Avenue, connecting to Regional infrastructure at the west end of Phase 2B of the PGEA. The wastewater would then be conveyed to the Mid-Halton Wastewater Treatment Plant.

This MCEA study will consider different site locations for the wastewater pumping station, focusing on feasibility, schedule deliverability, environmental and cultural impacts, land acquisition, coordination with ongoing and future projects and financial implications. This study is being carried out in accordance with Schedule B of the MCEA (October 2000, as amended 2007, 2011, 2015, and 2023), which is an approved process under the Ontario *Environmental Assessment Act*. The study area is shown in the attached Notice of Commencement. The study area for this MCEA study has changed with respect to the one identified for the ASP. This change is shown in Figure 1 at the end of this letter.

The purpose of this letter is to inform the Mississaugas of the Credit First Nation of the study, as well as to ask for assistance in determining if your Community may hold an interest in this project and if you would like to receive ongoing correspondence as the study progresses. We ask that you inform our project team of any preliminary questions, comments or concerns your Community has related to the MCEA study and the study area.

There will be opportunities for the public and interested parties to learn more about the project at future Public Information Centre (PIC) events. Separate from that process, the project team would like to extend an opportunity to the Mississaugas of the Credit First Nation to meet with the project team to learn more about the project, if desired. All comments and feedback from the Mississaugas of the Credit First Nation related to this study are welcome and will be considered throughout the MCEA study.

Upon completion of the MCEA Study, a Project File Report (PFR) will be prepared to document the MCEA Study process, including an inventory of environmental conditions, development and evaluation of alternative solutions, potential environmental impacts and mitigation measures, and the consultation process. A Notice of Completion will be issued to indicate that the planning process is complete. The PFR will be made publicly available for review and comment for a minimum of 30 days.

### **Archaeological Assessments**

In August 2023, LHC Heritage Planning & Archaeology Inc. conducted a Stage 1 Archaeological Assessment (herein referenced as "2023 Stage 1 AA") to support the ASP. The study area was a one-hectare parcel located within a larger property close to the intersection of Steeles Avenue and Winston Churchill Boulevard. The 2023 Stage 1 AA was completed on behalf of Halton Region to establish the archaeological significance of the proposed wastewater pumping station property and identify any potential archaeological resources (including those of Indigenous descent). In previous correspondence, it was indicated that Halton Region would proceed with a Stage 2 AA, as recommended in the 2023 Stage 1 AA.

After consultations with the Ministry of Citizenship and Multiculturalism (MCM), Halton Region was informed that the subject property was previously assessed in 2021 through a Stage 1 and 2 Archaeological Assessment conducted by The Archaeologist Inc. on behalf of the private landowner (herein referenced as "2021 Stage 1 & 2 AA"). The 2021 Stage 1 & 2 AA study area included the entire property beyond the proposed wastewater pumping station site. The 2021 Stage 1 and 2 AA was not yet entered into the registry when Halton Region conducted its 2023 Stage 1 AA, and therefore, it was not identified nor referenced.

Through correspondence with MCM staff, Halton Region was informed that the 2021 Stage 1 & 2 AA was entered into the registry, and, as such, MCM instructed Halton Region to update the 2023 Stage 1 AA accordingly. Based on the newly available documentation, the study area for the present MCEA study does not retain archaeological potential; therefore, a Stage 2 AA is no longer required.

The Region's subconsultant is revising the 2023 Stage 1 AA to include the new study area and to reference the 2021 Stage 1 & 2 AA. A draft copy of the revised 2023 Stage 1 AA can be provided for your review once it is completed. Halton Region welcomes your input before the revised 2023 Stage 1 AA is finalized and filed with MCM.

If you have any questions or would like to reach the project team directly, please contact Carlos Alonzo Moya, Project Manager, by emailing [carlos.alonzomoya@halton.ca](mailto:carlos.alonzomoya@halton.ca) or by calling 905-825-6000 ext. 7426,. Our project team would be pleased to answer any questions or respond to any concerns you may have.

Sincerely,

Carlos Alonzo Moya, M.A.Sc., P.Eng.

Project Manager II, Water & Wastewater Planning, Halton Region

**Re: Notice of Commencement – Halton Hills #4 Wastewater Pumping Station Municipal Class Environmental Assessment Study – Premier Gateway Employment Area, Town of Halton Hills**

To whom it may concern,

Halton Region provided a Notice of Archaeological Screening Process (ASP) for the Premier Gateway Phase 2B Wastewater Servicing Strategy project on November 6, 2023. Due to changes in the project and the planning process, Halton Region has terminated the ASP for the referenced project. Instead, Halton Region has retained R.V. Anderson Associates Limited to undertake a Municipal Class Environmental Assessment (MCEA) study for the Halton Hills #4 Wastewater Pumping Station to service Phase 2B of the Premier Gateway Employment Area (PGEA) in the Town of Halton Hills. Phase 2B of the PGEA is located north of Steeles Avenue, between Eighth Line North and Winston Churchill Boulevard. Extending municipal water and wastewater services to Phase 2B of the PGEA is crucial to enable the development of this employment area.

The wastewater servicing strategy for Phase 2B of the PGEA was identified in the 2008 South Halton Water and Wastewater Master Plan Update and confirmed in the 2011 Sustainable Halton Water and Wastewater Master Plan. The strategy consists of a new wastewater pumping station close to the intersection of Steeles Avenue and Winston Churchill Boulevard and a combination of gravity sewers and forcemains along Steeles Avenue, connecting to Regional infrastructure at the west end of Phase 2B of the PGEA. The wastewater would then be conveyed to the Mid-Halton Wastewater Treatment Plant.

This MCEA study will consider different site locations for the wastewater pumping station, focusing on feasibility, schedule deliverability, environmental and cultural impacts, land acquisition, coordination with ongoing and future projects and financial implications. This study is being carried out in accordance with Schedule B of the MCEA (October 2000, as amended 2007, 2011, 2015, and 2023), which is an approved process under the Ontario *Environmental Assessment Act*. The study area is shown in the attached Notice of Commencement. The study area for this MCEA study has changed with respect to the one identified for the ASP. This change is shown in Figure 1 at the end of this letter.

The purpose of this letter is to inform the Métis Nation of Ontario of the study, as well as to ask for assistance in determining if your Community may hold an interest in this project and if you would like to receive ongoing correspondence as the study progresses. We ask that you inform our project team of any preliminary questions, comments or concerns your Community has related to the MCEA study and the study area.

There will be opportunities for the public and interested parties to learn more about the project at future Public Information Centre (PIC) events. Separate from that process, the project team would like to extend an opportunity to the Métis Nation of Ontario to meet with the project team to learn more about the project, if desired. All comments and feedback from the Métis Nation of Ontario related to this study are welcome and will be considered throughout the MCEA study.

**The Regional Municipality of Halton**

Upon completion of the MCEA Study, a Project File Report (PFR) will be prepared to document the MCEA Study process, including an inventory of environmental conditions, development and evaluation of alternative solutions, potential environmental impacts and mitigation measures, and the consultation process. A Notice of Completion will be issued to indicate that the planning process is complete. The PFR will be made publicly available for review and comment for a minimum of 30 days.

### **Archaeological Assessments**

In August 2023, LHC Heritage Planning & Archaeology Inc. conducted a Stage 1 Archaeological Assessment (herein referenced as “2023 Stage 1 AA”) to support the ASP. The study area was a one-hectare parcel located within a larger property close to the intersection of Steeles Avenue and Winston Churchill Boulevard. The 2023 Stage 1 AA was completed on behalf of Halton Region to establish the archaeological significance of the proposed wastewater pumping station property and identify any potential archaeological resources (including those of Indigenous descent). In previous correspondence, it was indicated that Halton Region would proceed with a Stage 2 AA, as recommended in the 2023 Stage 1 AA.

After consultations with the Ministry of Citizenship and Multiculturalism (MCM), Halton Region was informed that the subject property was previously assessed in 2021 through a Stage 1 and 2 Archaeological Assessment conducted by The Archaeologist Inc. on behalf of the private landowner (herein referenced as “2021 Stage 1 & 2 AA”). The 2021 Stage 1 & 2 AA study area included the entire property beyond the proposed wastewater pumping station site. The 2021 Stage 1 and 2 AA was not yet entered into the registry when Halton Region conducted its 2023 Stage 1 AA, and therefore, it was not identified nor referenced.

Through correspondence with MCM staff, Halton Region was informed that the 2021 Stage 1 & 2 AA was entered into the registry, and, as such, MCM instructed Halton Region to update the 2023 Stage 1 AA accordingly. Based on the newly available documentation, the study area for the present MCEA study does not retain archaeological potential; therefore, a Stage 2 AA is no longer required.

The Region’s subconsultant is revising the 2023 Stage 1 AA to include the new study area and to reference the 2021 Stage 1 & 2 AA. A draft copy of the revised 2023 Stage 1 AA can be provided for your review once it is completed. Halton Region welcomes your input before the revised 2023 Stage 1 AA is finalized and filed with MCM.

If you have any questions or would like to reach the project team directly, please contact Carlos Alonzo Moya, Project Manager, by emailing [carlos.alonzomoya@halton.ca](mailto:carlos.alonzomoya@halton.ca) or by calling 905-825-6000 ext. 7426,. Our project team would be pleased to answer any questions or respond to any concerns you may have.

Sincerely,

Carlos Alonzo Moya, M.A.Sc., P.Eng.

**[CAUTION EXTERNAL EMAIL]** Make Sure that it is legitimate **before** Replying or Clicking on any links

Good morning, Ms. Russell,

This is a follow-up email about the Halton Hills #4 Wastewater Pumping Station Schedule B Municipal Class Environmental Assessment study. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

As noted in our cover letter dated July 24, 2024, the Region updated the draft Stage 1 Archaeological Assessment completed in October 2023. The revised version incorporates the new limits of the study area and references the findings of the 2021 Stage 1 and 2 Archaeological Assessment completed by The Archaeologist Inc. for the larger property beyond the study area.

Our Cover Letter, Notice of Commencement and the revised draft Stage 1 Archaeological Assessment are attached for further details. The Region welcomes your input on the updated Stage 1 Archaeological Assessment by November 15, 2024, before it is finalized and submitted to the Ministry of Citizenship and Multiculturalism on November 18, 2024.

The Region also updated the Natural Environment study to reflect the new limits of the study area. This study was provided to the Six Nations of the Grand River on October 10, 2024.

Additionally, please note that moving forward, the Region's contact for this project will be Alexandria Rees, who is copied on this email.

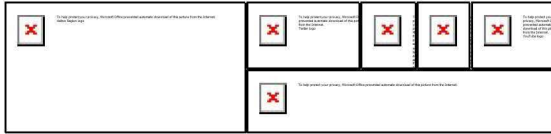

Please do not hesitate to contact her if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

**Subject:** Halton Hills #4 Wastewater Pumping Station Class EA - Notice of Commencement

Good morning, Ms. Russell,

Halton Region has retained R.V. Anderson Associates Ltd. to assist with the completion of a Schedule B Municipal Class Environmental Assessment (MCEA) study for the new Halton Hills #4 Wastewater Pumping Station. The new wastewater pumping station will be located near the intersection of Steeles Avenue and Winston Churchill Boulevard in the Premier

Gateway Employment Area in the Town of Halton Hills. This study aims to identify the preferred site for the new wastewater pumping station.

In November 2023, Halton Region started an Archaeological Screening Process (ASP) for this wastewater pumping station. However, the ASP was terminated due to changes in the project and planning process.

Please find attached our Cover Letter and Notice of Commencement for further details.

Feel free to contact the undersigned if you have any questions regarding the study.

Best regards,  
Carlos Alonzo Moya

**Re: Notice of Commencement – Halton Hills #4 Wastewater Pumping Station Municipal Class Environmental Assessment Study – Premier Gateway Employment Area, Town of Halton Hills**

Dear Ms. Russell,

Halton Region provided a Notice of Archaeological Screening Process (ASP) for the Premier Gateway Phase 2B Wastewater Servicing Strategy project on November 6, 2023. Due to changes in the project and the planning process, Halton Region has terminated the ASP for the referenced project. Instead, Halton Region has retained R.V. Anderson Associates Limited to undertake a Municipal Class Environmental Assessment (MCEA) study for the Halton Hills #4 Wastewater Pumping Station to service Phase 2B of the Premier Gateway Employment Area (PGEA) in the Town of Halton Hills. Phase 2B of the PGEA is located north of Steeles Avenue, between Eighth Line North and Winston Churchill Boulevard. Extending municipal water and wastewater services to Phase 2B of the PGEA is crucial to enable the development of this employment area.

The wastewater servicing strategy for Phase 2B of the PGEA was identified in the 2008 South Halton Water and Wastewater Master Plan Update and confirmed in the 2011 Sustainable Halton Water and Wastewater Master Plan. The strategy consists of a new wastewater pumping station close to the intersection of Steeles Avenue and Winston Churchill Boulevard and a combination of gravity sewers and forcemains along Steeles Avenue, connecting to Regional infrastructure at the west end of Phase 2B of the PGEA. The wastewater would then be conveyed to the Mid-Halton Wastewater Treatment Plant.

This MCEA study will consider different site locations for the wastewater pumping station, focusing on feasibility, schedule deliverability, environmental and cultural impacts, land acquisition, coordination with ongoing and future projects and financial implications. This study is being carried out in accordance with Schedule B of the MCEA (October 2000, as amended 2007, 2011, 2015, and 2023), which is an approved process under the Ontario *Environmental Assessment Act*. The study area is shown in the attached Notice of Commencement. The study area for this MCEA study has changed with respect to the one identified for the ASP. This change is shown in Figure 1 at the end of this letter.

The purpose of this letter is to inform the Six Nations of the Grand River of the study, as well as to ask for assistance in determining if your Community may hold an interest in this project and if you would like to receive ongoing correspondence as the study progresses. We ask that you inform our project team of any preliminary questions, comments or concerns your Community has related to the MCEA study and the study area.

There will be opportunities for the public and interested parties to learn more about the project at future Public Information Centre (PIC) events. Separate from that process, the project team would like to extend an opportunity to the Six Nations of the Grand River to meet with the project team to learn more about the project, if desired. All comments and feedback from the Six Nations of the Grand River related to this study are welcome and will be considered throughout the MCEA study.

**The Regional Municipality of Halton**

Upon completion of the MCEA Study, a Project File Report (PFR) will be prepared to document the MCEA Study process, including an inventory of environmental conditions, development and evaluation of alternative solutions, potential environmental impacts and mitigation measures, and the consultation process. A Notice of Completion will be issued to indicate that the planning process is complete. The PFR will be made publicly available for review and comment for a minimum of 30 days.

### **Archaeological Assessments**

In August 2023, LHC Heritage Planning & Archaeology Inc. conducted a Stage 1 Archaeological Assessment (herein referenced as “2023 Stage 1 AA”) to support the ASP. The study area was a one-hectare parcel located within a larger property close to the intersection of Steeles Avenue and Winston Churchill Boulevard. The 2023 Stage 1 AA was completed on behalf of Halton Region to establish the archaeological significance of the proposed wastewater pumping station property and identify any potential archaeological resources (including those of Indigenous descent). In previous correspondence, it was indicated that Halton Region would proceed with a Stage 2 AA, as recommended in the 2023 Stage 1 AA.

After consultations with the Ministry of Citizenship and Multiculturalism (MCM), Halton Region was informed that the subject property was previously assessed in 2021 through a Stage 1 and 2 Archaeological Assessment conducted by The Archaeologist Inc. on behalf of the private landowner (herein referenced as “2021 Stage 1 & 2 AA”). The 2021 Stage 1 & 2 AA study area included the entire property beyond the proposed wastewater pumping station site. The 2021 Stage 1 and 2 AA was not yet entered into the registry when Halton Region conducted its 2023 Stage 1 AA, and therefore, it was not identified nor referenced.

Through correspondence with MCM staff, Halton Region was informed that the 2021 Stage 1 & 2 AA was entered into the registry, and, as such, MCM instructed Halton Region to update the 2023 Stage 1 AA accordingly. Based on the newly available documentation, the study area for the present MCEA study does not retain archaeological potential; therefore, a Stage 2 AA is no longer required.

The Region’s subconsultant is revising the 2023 Stage 1 AA to include the new study area and to reference the 2021 Stage 1 & 2 AA. A draft copy of the revised 2023 Stage 1 AA can be provided for your review once it is completed. Halton Region welcomes your input before the revised 2023 Stage 1 AA is finalized and filed with MCM.

If you have any questions or would like to reach the project team directly, please contact Carlos Alonzo Moya, Project Manager, by emailing [carlos.alonzomoya@halton.ca](mailto:carlos.alonzomoya@halton.ca) or by calling 905-825-6000 ext. 7426,. Our project team would be pleased to answer any questions or respond to any concerns you may have.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Carlos Alonzo Moya', with a stylized flourish at the end.
