We’re getting things moving!

We are pleased to let residents know that work to improve Trafalgar Road is underway! More than 60,000 commuters rely on this corridor to get to work, school and services every day. These improvements will keep the road safe and motorists, cyclists, pedestrians and transit users moving. Residents can look forward to:

• six lanes and new traffic signals to improve commute times;
• new sidewalks and bike lanes to make walking and cycling safer;
• new bus stops and shelters for more travel options;
• upgraded water mains to continue a high level of service;
• installation of stormwater infrastructure designed to adapt to the effects of climate change and protect the environment; and
• the installation of an Advanced Traffic Management System to respond to real-time traffic demands.

This is an important project for residents of Halton region and a key infrastructure investment. Thank you for your patience as we build a better Halton!

Our progress to date

Environmental Assessment completed to address future traffic capacity and safe travel options
Detailed design completed
Relocation of utilities

Managing traffic & creating a Smart Work Zone

Construction may cause traffic delays or lane restrictions. Here is what we are doing to minimize traffic disruptions, avoid full road closures and prioritize safety:

• road widening one side at a time to keep two lanes in each direction;
• trenchless (underground) technologies for water and stormwater main replacements;
• vehicle detection (such as cameras and sensors) installed at traffic signals to reduce unnecessary red lights and maximize green time at intersections;
• coordination with Oakville Transit and Metrolinx to reduce impact on transit users; and
• speed limit reductions to 50 km/h within the area.

A Smart Work Zone uses real-time traffic data so we can rapidly respond to issues. It keeps the work zone safe and traffic moving.

Future rendering – Southbound Trafalgar Road lanes north of Leighland Avenue.
Stay connected as we build a better Trafalgar Road

Information for residents in the area

- Residents will receive advance notice through letter, email or in-person of any service disruptions, such as curbside waste collection or water service.
- Work will be scheduled in accordance with local noise bylaws. Some work outside of regular working hours may be necessary to conduct technically challenging construction operations.
- The contractor is required to manage dust and mud.
- Please use extra caution while driving as there will be an occasional increase in truck traffic.

Never miss an update!

Visit halton.ca to learn more about this project or other Regional improvements:

Building a better Halton is about more than construction

It is about investments in infrastructure, service delivery improvements and building complete communities that maintain the high quality of life that residents expect and enjoy.

Thank you for your patience as we build a better Trafalgar!
